Energy Efficiency Jobs in America

NEARLY 2.3 MILLION AMERICANS WORK IN ENERGY EFFICIENCY

Energy efficiency (EE) boasted more job growth than any other U.S. energy technology sector in 2023, with nearly 75,000 new jobs added—the strongest increase for EE since 2018. Energy efficiency jobs boost the entire U.S. economy, and workers operate in almost every county of the country. The EE workforce fills a crucial role in maintaining and improving our built environment, reducing building energy use nationwide.

Construction jobs for efficient buildings grew fastest of all EE subsectors. Within this industry, training and certifications help ensure quality building performance and healthier indoor spaces. Those with key credentials earn competitive salaries while creating better buildings and efficient infrastructure.

EE job numbers—the largest in clean energy overall*—continue to rise significantly. Prioritizing EE workforce development in every state is essential to creating stronger communities and opportunities for a more diverse workforce, and to support the multitude of small businesses that will get the job done.

This report serves as a baseline by which to measure future EE job growth enabled by critical large-scale investments such as the Infrastructure Investment and Jobs Act (IIJA) and Inflation Reduction Act (IRA).

TDS = Transmission, Distribution, & Storage

EPG = Electric Power Generation

*Also includes jobs in energy storage and grid modernization that enable renewable electricity

**Includes other subsectors such as corn ethanol, woody biomass, large hydropower

BIG-PICTURE CONTEXT

Using 2023 data, this report focuses solely on the EE sector of the U.S. economy. It emphasizes the built environment, capturing only the jobs where workers use certified energy efficiency products or those installed according to ENERGY STAR guidelines, and high-performance building materials. It omits EE jobs in transportation and electric grid technologies, water use or waste management, among others.

*largest except for vehicle-related clean energy jobs, not covered by this report; EE job growth has been steady, post-pandemic

IN PERSPECTIVE

2 in every 5 jobs in the U.S. energy sector are in energy efficiency (>40%)

1.24 million construction jobs are in energy efficiency; over 16% of total U.S. construction workers spend at least 50% of their time on EE

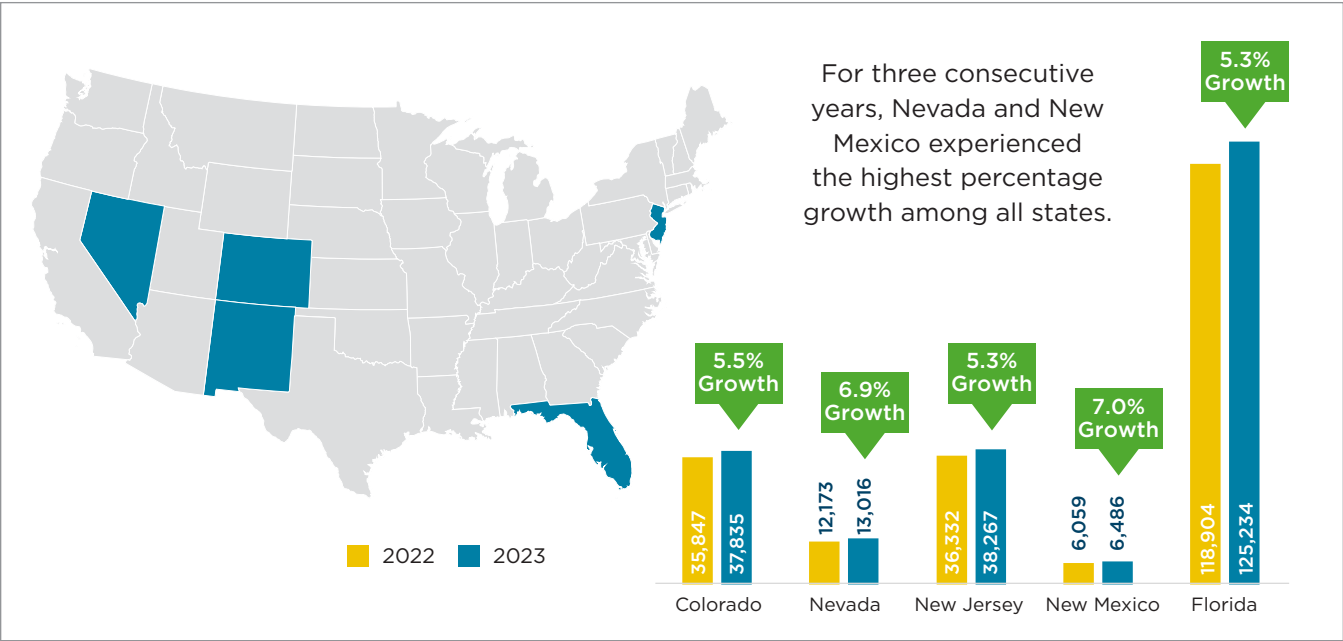

2.1x Energy efficiency employs 2.1 times as many workers in the U.S. as the entire fossil fuel industry

9% of energy efficiency jobs are held by veterans (206,691), greater than the national average of veterans in the workforce (5%)

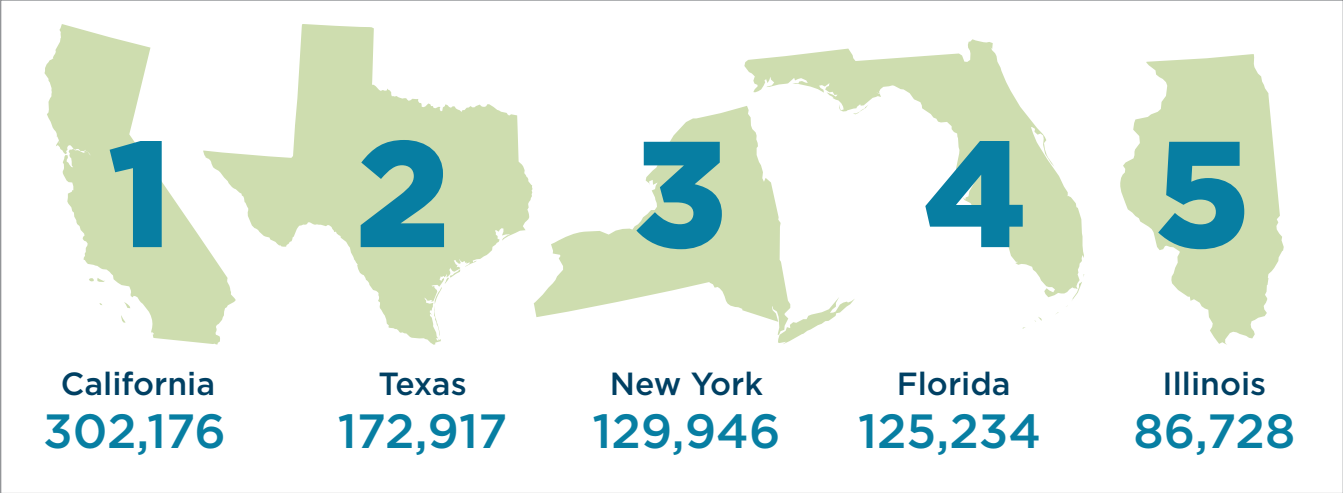

EE JOBS YEAR-OVER-YEAR

TOP STATES FOR GROWTH

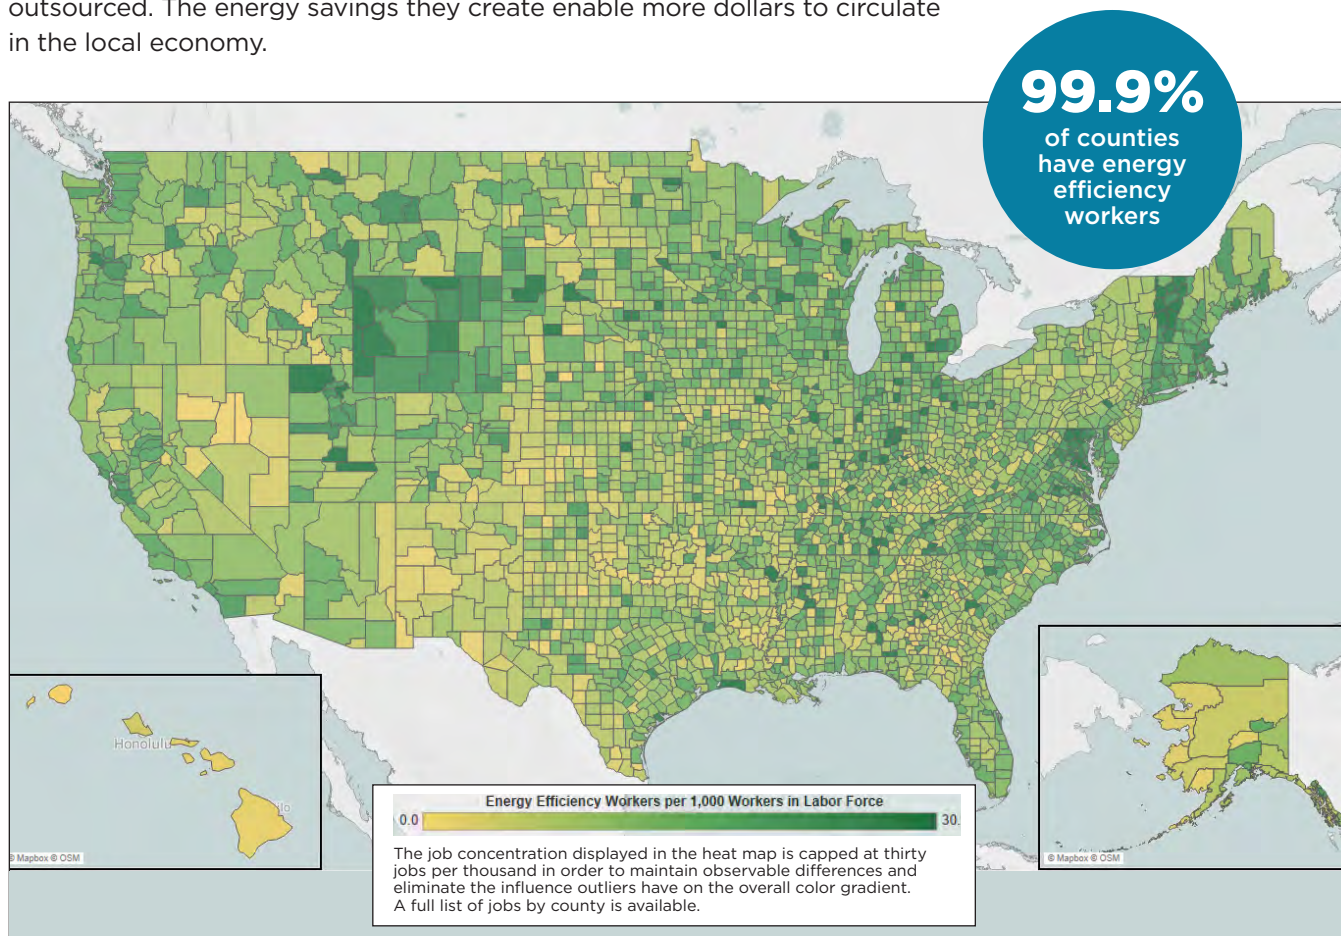

TOP TOTAL GROSS JOBS

*Projected Growth chart from 2023 USEER statistics based on contractor expectations for hiring in the coming year.

YOUR LOCAL ECONOMY BENEFITS FROM ENERGY EFFICIENCY

How do energy efficiency jobs—in 99.9% of U.S. counties—impact every local economy? Because all buildings can be tapped for deeper energy savings, this workforce is on the ground everywhere. Improved insulation, better HVAC and appliances, and new digital controls are a few common upgrades. Most of the jobs associated with these upgrades must be performed by local EE workers and cannot be outsourced. The energy savings they create enable more dollars to circulate in the local economy.

Half of U.S. states have over **32,000** EE workers each, with
40 states and D.C. employing at least **10,000** each.

BEYOND THE BIG CITIES

269,064

Americans
living in rural areas
work in energy
efficiency.

288,245

U.S. energy
efficiency jobs
are in counties
with fewer than
100,000 residents.

881,996

energy efficiency
jobs are outside
America's top 50
metro areas.

INDUSTRIES, TECHNOLOGIES, & ROLES: THE EE WORKFORCE

Reducing energy waste drives job creation. Energy efficiency professionals work in factories, offices, design studios, and data center construction. Beyond reducing energy use and costs, they improve system operations, health, and comfort in existing buildings. They design and build a better, more cost-effective future.

Across Positions

Across Industries

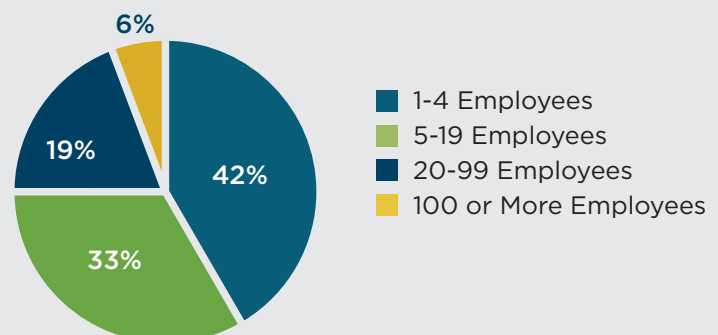

Across Technologies

EMPOWERING AMERICA: THE SMALL BUSINESS IMPACT

75% of the **390,706** energy efficiency establishments in the U.S. are small businesses with **fewer than 20 employees**. 94% are businesses with fewer than 100 employees.

EE contractors and small businesses are boosting local economies across America.

ENHANCING WORKFORCE DIVERSITY IS VITAL FOR ENERGY EFFICIENCY SUCCESS

The EE industry is growing, yet its workforce has not fully recovered from sharp pandemic-related losses. In 2023, the number of EE jobs was equal to 96% of the number of EE jobs that existed pre-pandemic. Recent federal investments will help, and the industry can contribute to accelerated recovery by improving workforce diversity.

A diverse workforce is proven to boost innovation, productivity, employee satisfaction, and retention, as well as profits. Diversity in hiring will be key to improving business outcomes and ensuring that communities across the nation are better represented in the efficiency sector. Investing resources to ensure EE workforce trainings are deployed in diverse communities will also enable a more diverse pool of potential workers to access and build careers in EE.

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Nonbinary gender data is missing from this document due to this limitation in the national data.

The EE industry needs to do more to **prioritize** the training and support that enables access to employment at EE businesses for people of color and women.

*Includes non-Hispanic and Hispanic whites.

WORKFORCE AGE & UNION STATUS

The EE workforce is primarily comprised of young and middle-aged workers, with higher representation of 18-54 compared to both the overall energy workforce and the national workforce.

EE workers have a higher rate of union membership than the national average.

13% of EE pros (297,723) are represented by a **union** compared to the national average of 7% (private sector).

WORKFORCE NEEDS BY STATE: MAXIMIZING SUCCESS

EE business owners saw slightly fewer recruitment challenges in 2023 than in 2022. However, more than 83% still reported difficulty in finding suitable employees. To meet increased demand by federal and other investments in energy efficiency, the EE workforce will continue to grow despite these obstacles.

How can decision-makers align workforce training with career paths more effectively to benefit both employers and job candidates? One way is by considering the distribution of existing EE jobs. While most EE jobs are in construction, many opportunities exist in manufacturing and professional services.

EE Workers in Construction

EE workers employed in construction
31% 86.1%

Over 1.2 million U.S. construction workers are employed with a primary focus on energy efficiency. Among all industries, this sector reported the most significant hiring hurdles, with 86% of employers saying it was either “very difficult” or “somewhat difficult” to recruit qualified personnel.

Unionized construction firms* experienced more success in hiring, with only 36% reporting that hiring was “very difficult.”

*Defined as firms with at least 20% of their employees belonging to a union or covered by a project labor or collective bargaining agreement.

Construction: Employer Perspective on Hiring Difficulty

EE Workers in Professional Services and Other

EE workers employed in professional services and other
6.5% 51.8%

Engineers, designers, architects, and financial services and legal professionals represent nearly 540,000 U.S. efficiency workers.

Professional Services & Other: Employer Perspective on Hiring Difficulty

EE Workers in Manufacturing and Trade

EE workers employed in manufacturing and trade
1.7% 55.5%

U.S. manufacturing of energy efficient products comprises nearly 513,000 jobs.

Manufacturing & Trade: Employer Perspective on Hiring Difficulty

POLICY LEADERSHIP

Energy efficiency saves money, reduces emissions, improves air quality and public health, and makes us more energy independent—while also tackling climate change and creating jobs. The Inflation Reduction Act (IRA) and the Infrastructure Investment and Jobs Act (IIJA) included historic investments aimed at advancing energy efficiency across the country. The effective implementation of the energy efficiency provisions in IRA and IIJA, and the continued funding for government-led energy efficiency activities, are both crucial to realizing the benefits of this critical energy source.

Federal policy leadership can ensure that energy efficiency and indoor air quality are addressed to benefit property owners, occupants, and the country.

Maintain and ensure robust funding for proven federal energy efficiency programs, including:

- State energy programs
- Weatherization assistance programs
- Energy efficiency and conservation block grants

Use Federal Investments Wisely

Ensure effective implementation of key incentives and rebates included in the IRA and the IIJA for building owners, households, and public buildings to make smart property upgrades that create jobs and improve building performance, such as:

Protect Inflation Reduction Act Opportunities

- Commercial and multifamily residential building tax credits (179D Energy Efficient Commercial Building Deduction; 45L New Energy Efficient Home Tax Credit)
- Single family home tax credits (25C Home Energy Efficiency Improvement Credit), which includes credits for the following efficiency measures and efficient appliances (not a comprehensive list):
 - Air Source Heat Pumps and Heat Pump Water Heaters (30% of costs, including labor, up to \$2,000 annually)
 - Insulation and Air Sealing (30% of costs, not including labor, up to \$1,200 annually)
 - Home Energy Audits (30% of costs up to \$150 credited annually)
- Residential rebate programs administered by State Energy Offices to drive efficiency and electrification deployment and job creation for local contractors—the Home Efficiency Rebates (HOMES*) program, and the Home Electrification and Appliance Rebates (HEAR**). As of December 2024, over three dozen states have applied for full funding to launch their home energy rebate programs. Of that group, [more than 10 have launched programs](#)—with many additional states planning for launch in the coming months.
- Training for Residential Energy Contractors (TREC) program, also administered by State Energy Offices to expand the EE and electrification workforce
- Greenhouse Gas Reduction Fund (GGRF) competitive grants for states, Tribal governments, municipalities, and nonprofits to mobilize financing for clean energy and climate projects that reduce emissions (including efficiency). The Environmental Protection Agency has distributed awards for the National Clean Investment Fund (3 grant recipients); Clean Communities Investment Accelerator (5 grant recipients); and Solar for All (60 grant recipients). Many awardees aim to support projects that lower energy bills and create job opportunities across the country.

Internal Revenue Service data shows that 2.3 million families claimed more than \$2 billion in credits in 2023 from the 25C energy efficiency tax credit.

*a.k.a. HER
**a.k.a. HEEHRA

Protect Infrastructure Investment and Jobs Act Opportunities:

- Energy Auditor Training grant program for states to train individuals to conduct energy audits or conduct surveys of commercial and residential buildings
- Energy Efficiency Revolving Loan Fund Capitalization Grant Program for states to establish revolving loan funds in support of loans and grants for EE audits, upgrades, and retrofits to increase building efficiency

Support other policy initiatives to further advance energy efficiency nationwide, including:

- Programs focused on resilience, energy efficiency, and air quality in public buildings
- Tax credits and rebates for U.S. manufacturing of energy efficient appliances and technologies
- Stronger building and appliance efficiency standards, with training and enforcement
- ENERGY STAR, which helps people make smart energy choices
- Energy audits, technical assistance, and financing options for large manufacturers
- Directing FEMA (Federal Emergency Management Agency) to ensure that rebuilding complies with updated international building codes and advances energy efficiency
- Healthy homes programs to address barriers to comprehensive energy upgrades and ensure more habitable and comfortable living conditions, especially in low-income and disadvantaged communities.

Advance and prioritize workforce development and diversity, equity, and inclusion in federal energy efficiency programs:

- Strengthen workforce development and apprenticeship programs for the EE sector
- Create a workforce grant program to help organizations and small businesses hire and train new EE employees with a focus on diversity, equity, and inclusion
- Increase grants and financing to deploy more efficiency projects in underserved communities that often carry greater energy burdens while developing career opportunities for local workers

State and local leaders can keep energy efficiency jobs growing.

State and local leaders can:

- Adopt high efficiency and indoor air quality standards for new construction and existing buildings, leveraging IRA funds to support assistance for the latest (net zero) building energy code adoption for state and local governments
- Adopt energy benchmarking and reporting requirements for existing buildings
- Incorporate broader use of performance contracting in public buildings
- Advance commercial property assessed clean energy (PACE) programs
- Modernize regulations to ensure transparent and comprehensive cost-effectiveness evaluations
- Align utility incentives with investments in efficiency
- Invest in advanced infrastructure to enable interval data analytics of energy use, and to boost resilience
- Join coalitions to pass policies to accelerate the deployment of heat pumps and other major efficient appliances and upgrades incentivized by HOMES and HEAR programs.

ABOUT THE REPORT

The job numbers come from the national 2024 U.S. Energy and Employment Report (USEER), which focuses on all energy jobs. The USEER analyzes data from the U.S. Bureau of Labor Statistics (BLS) Quarterly Census of Employment and Wages (QCEW) to track employment across sectors including energy production, transmission, and distribution. In addition, the USEER relies on a unique supplemental survey of business representatives across the U.S. For the 2024 USEER, 42,100 businesses participated in the survey. Taken together, the BLS

and survey data provide the most comprehensive calculation of energy-related employment available. The methodology has been used for local, state, and federal energy-related data collection and analysis for a decade. See the USEER Appendices for complete methodology details. For more report details, see [Energy Efficiency Jobs in America FAQ](#) or contact the Building Performance Association or E4TheFuture. This report incorporates newly available data released as of April 2025.

ABOUT BPA

The Building Performance Association (BPA) is a 501(c)(6) nonprofit industry association that serves as the hub for businesses, nonprofits, and government agencies working to make America's homes more comfortable, healthy, and energy efficient. Our mission is to transform the market for the home performance industry through advocacy, education, professional development, and networking. Visit building-performance.org.

ABOUT BW Research

BW Research Partnership is a full-service, economic and workforce research consulting firm with offices in Carlsbad, California and Wrentham, Massachusetts. It is the nation's leading provider of accurate, comprehensive energy and clean energy research studies.

Visit bwresearch.com.

ABOUT E4TheFuture

E4TheFuture is dedicated to bringing clean, efficient energy home for every American and promotes energy solutions to advance climate protection and economic fairness.

Visit E4TheFuture.org.

Alabama

Energy Efficiency Jobs in America

30,341

Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Alabama?

Energy efficiency is the largest energy sector in Alabama.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

Updated April 2025

What does EE look like in Alabama?

EE Workers Employed in AL

89.5% of AL EE Businesses Have Fewer Than 100 Employees

EE construction workers comprise **17%** of Alabama's construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

How is EE doing on diversity in Alabama?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Alabama communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Alabama businesses.

*Includes non-Hispanic and Hispanic whites.

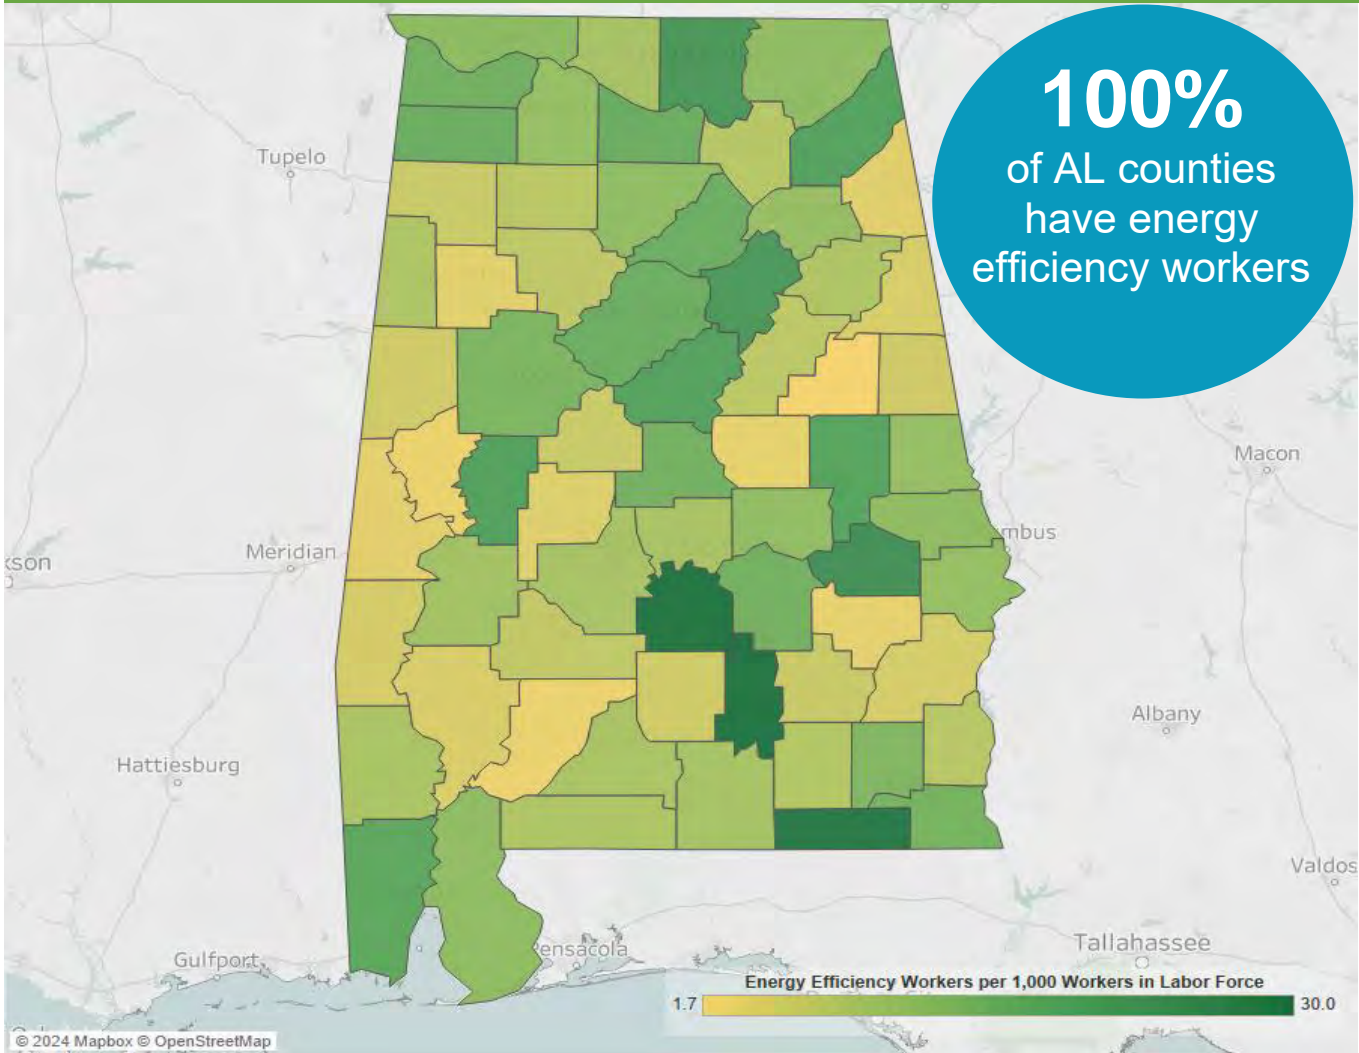

Gender in the Alabama EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

Energy Efficiency Jobs are Everywhere

EE Jobs by County

The energy efficiency job concentration displayed above is capped at thirty jobs per thousand in order to maintain observable differences between the majority of counties within the state. This is done to eliminate the influence outliers have on overall color gradient. For a full list of energy efficiency jobs by county, please visit the Department of Energy's (DOE) United States Energy and Employment Report (USEER) County-Level data site at <https://www.energy.gov/media/330956>.

How is EE doing on diversity in Arizona?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Arizona communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Arizona businesses.

Arizona EE Industry by Race and Ethnicity

*Includes non-Hispanic and Hispanic whites.

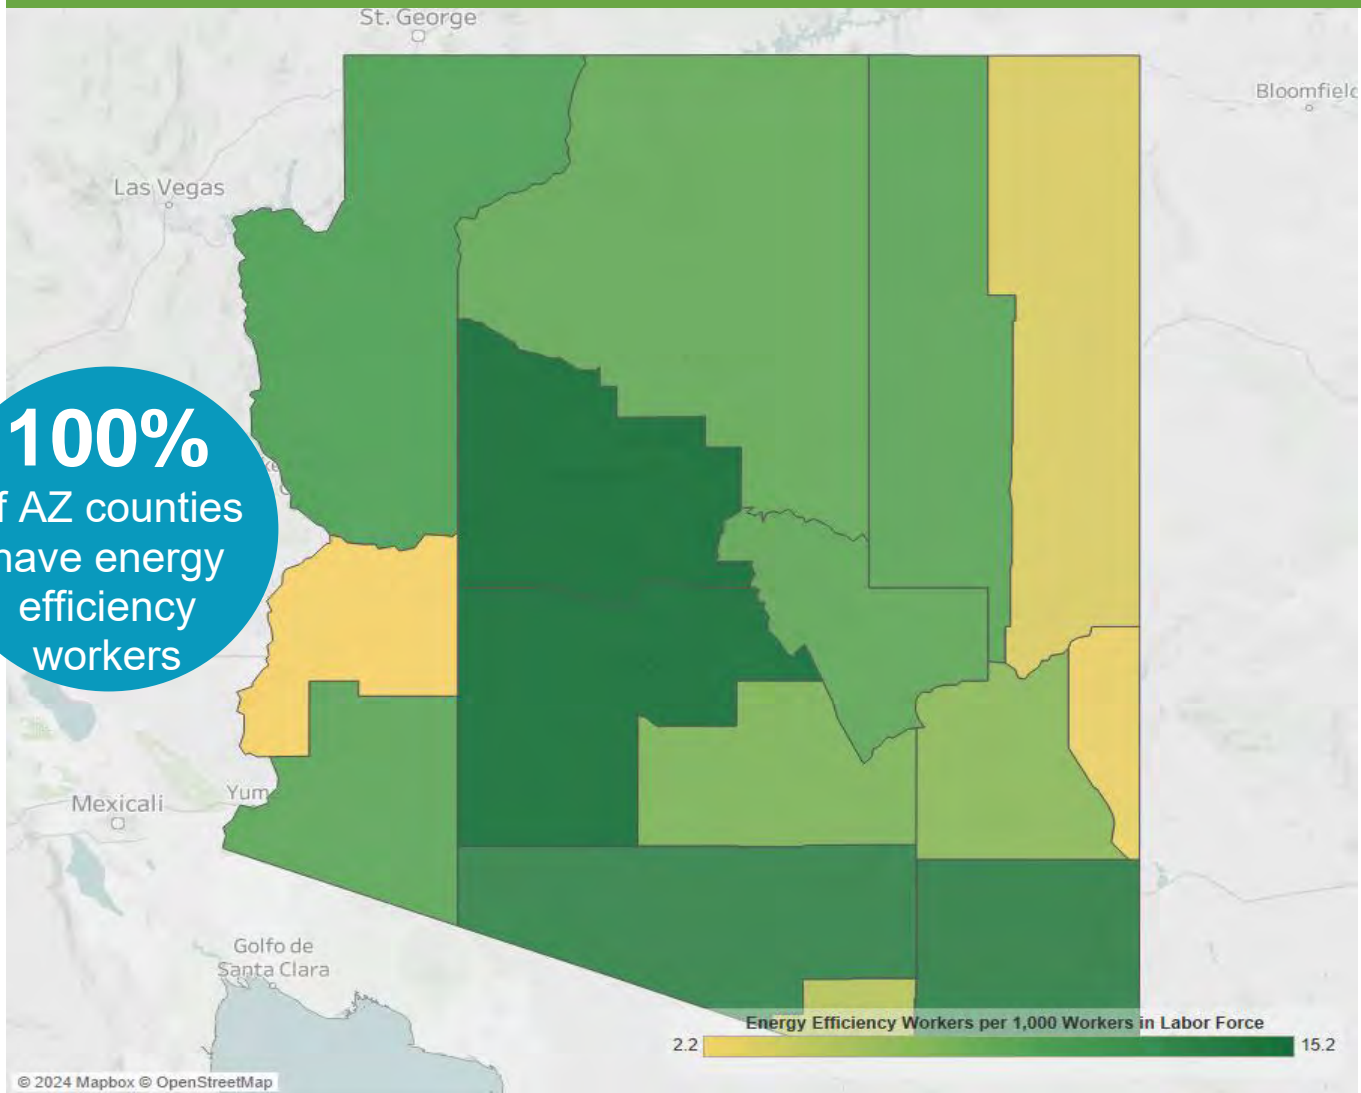

Gender in the Arizona EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

Energy Efficiency Jobs in America

15,526
Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Arkansas?

Energy efficiency is the largest energy sector in Arkansas.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

What does EE look like in Arkansas?

EE Workers Employed in AR

90.6% of AR EE Businesses Have Fewer Than 100 Employees

EE construction workers comprise **17%** of Arkansas' construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

How is EE doing on diversity in Colorado?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Colorado communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Colorado businesses.

Colorado EE Industry by Race and Ethnicity

*Includes non-Hispanic and Hispanic whites.

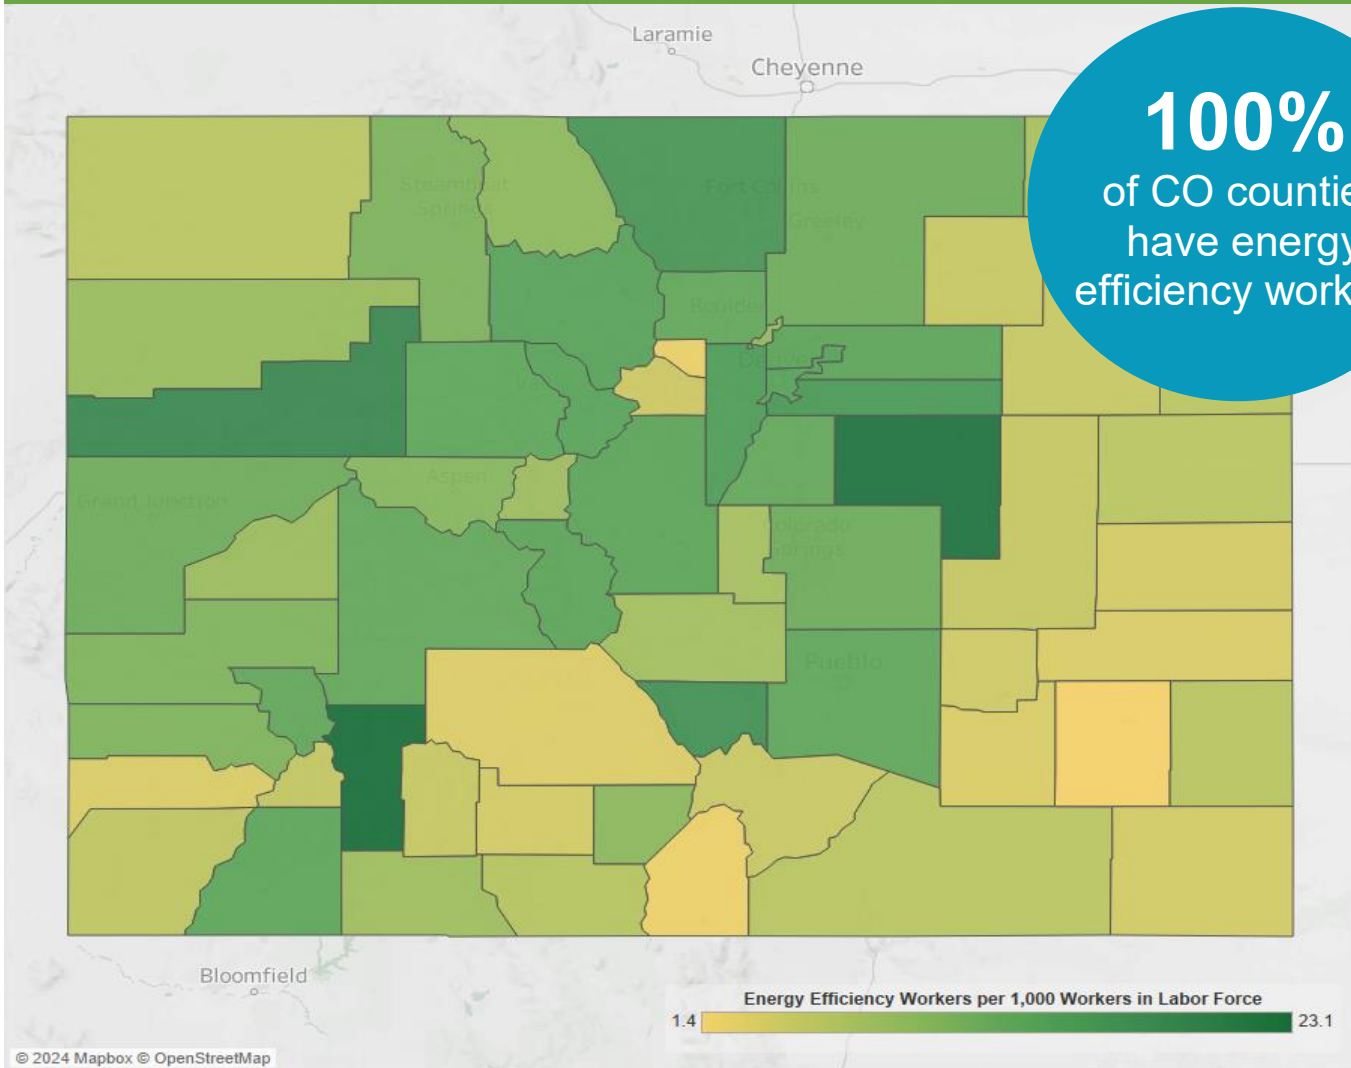

Gender in the Colorado EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

Connecticut

Energy Efficiency Jobs in America

35,250
Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Connecticut?

Energy efficiency is the largest energy sector in Connecticut.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

What does EE look like in Connecticut?

EE Workers Employed in CT

94% of CT EE Businesses Have Fewer Than 100 Employees

EE construction workers comprise **30%** of Connecticut's construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

How is EE doing on diversity in Connecticut?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Connecticut communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Connecticut businesses.

Connecticut EE Industry by Race and Ethnicity

*Includes non-Hispanic and Hispanic whites.

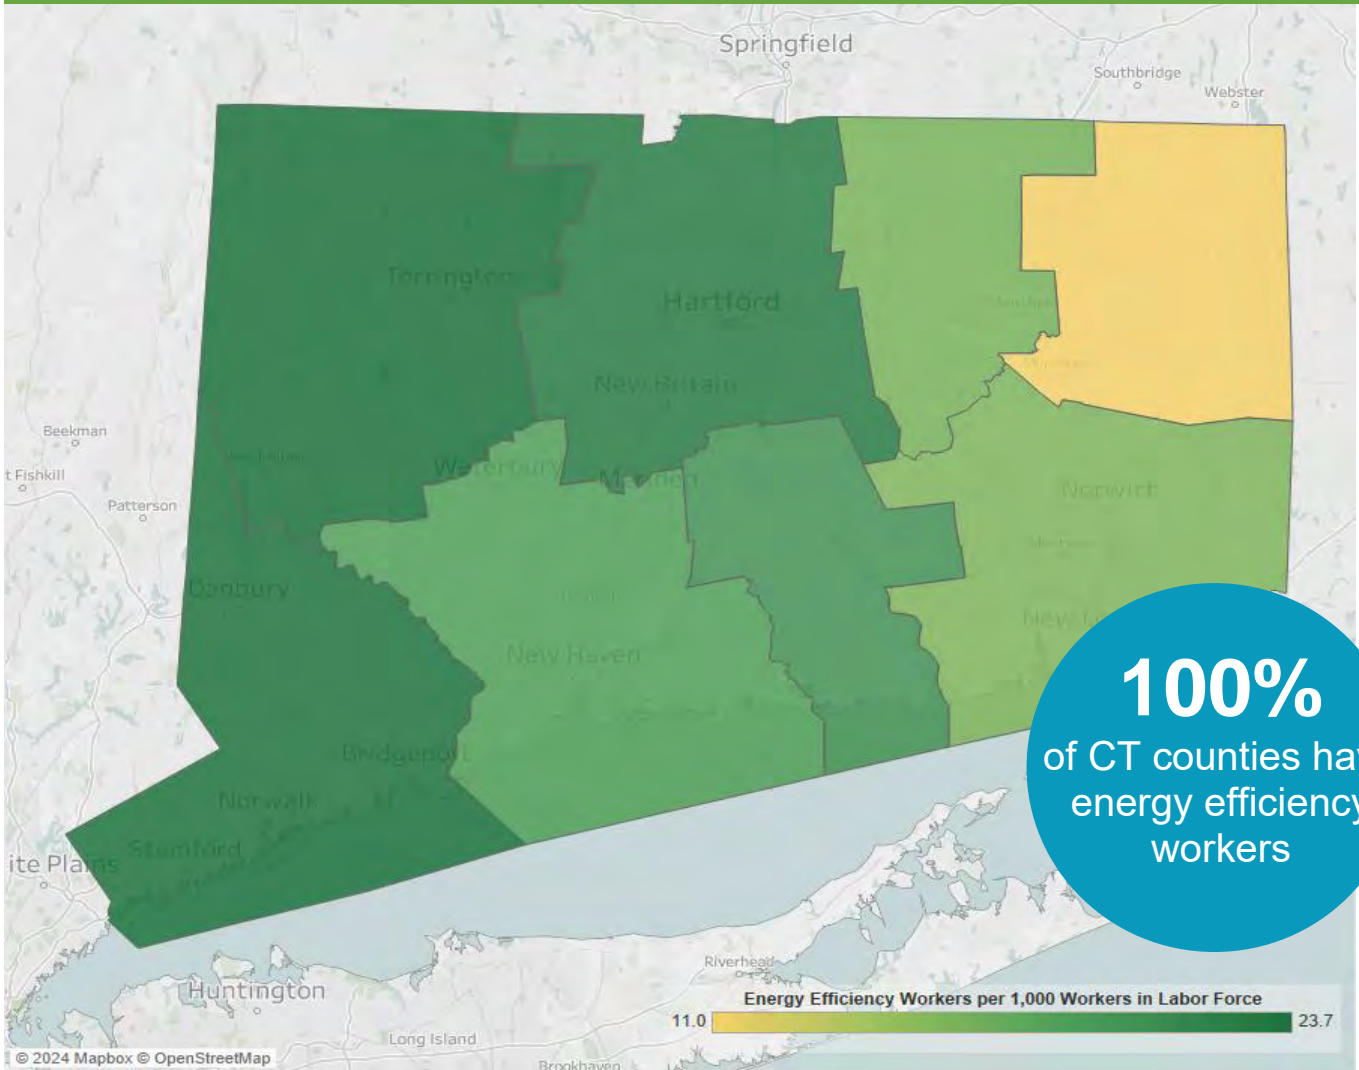

Gender in the Connecticut EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

The Building Performance Association (BPA) is a 501(c) 6 nonprofit industry association that serves as the hub for businesses, nonprofits, and government agencies working to make America's homes more comfortable, healthy, and energy efficient. Our mission is to transform the market for the home performance industry through advocacy, education, professional development, and networking. Visit www.building-performance.org.

E4TheFuture is dedicated to bringing clean, efficient energy home for every American and promotes energy solutions to advance climate protection and economic fairness. Visit www.E4TheFuture.org.

BW Research Partnership is a full-service, economic and workforce research consulting firm with offices in Carlsbad, California and Wrentham, Massachusetts. It is the nation's leading provider of accurate, comprehensive energy and clean energy research studies. Visit www.bwresearch.com.

Data Source: Unless otherwise stated, all data are from the U.S. Energy and Employment Report, August 2024, by the U.S. Department of Energy (see Appendix B for methodology details). This methodology — adopted by the U.S. Dept. of Energy for its 2017 U.S. Energy and Employment Report, approved by the Office of Management and Budget and grounded on data collected by the Bureau of Labor Statistics — provides the broadly accepted best accounting of all U.S. energy workers.

For questions on BPA analyses please email: communications@building-performance.org

Georgia

Energy Efficiency Jobs in America

58,067
Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Georgia?

Energy efficiency is the largest energy sector in Georgia.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

E4 THE FUTURE

What does EE look like in Georgia?

EE Workers Employed in GA

94.6% of GA EE Businesses Have Fewer Than 100 Employees

EE construction workers comprise **16%** of Georgia's construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

11%
 of Georgia
 EE workers are
Veterans

How is EE doing on diversity in Georgia?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Georgia communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Georgia businesses.

Georgia EE Industry by Race and Ethnicity

*Includes non-Hispanic and Hispanic whites.

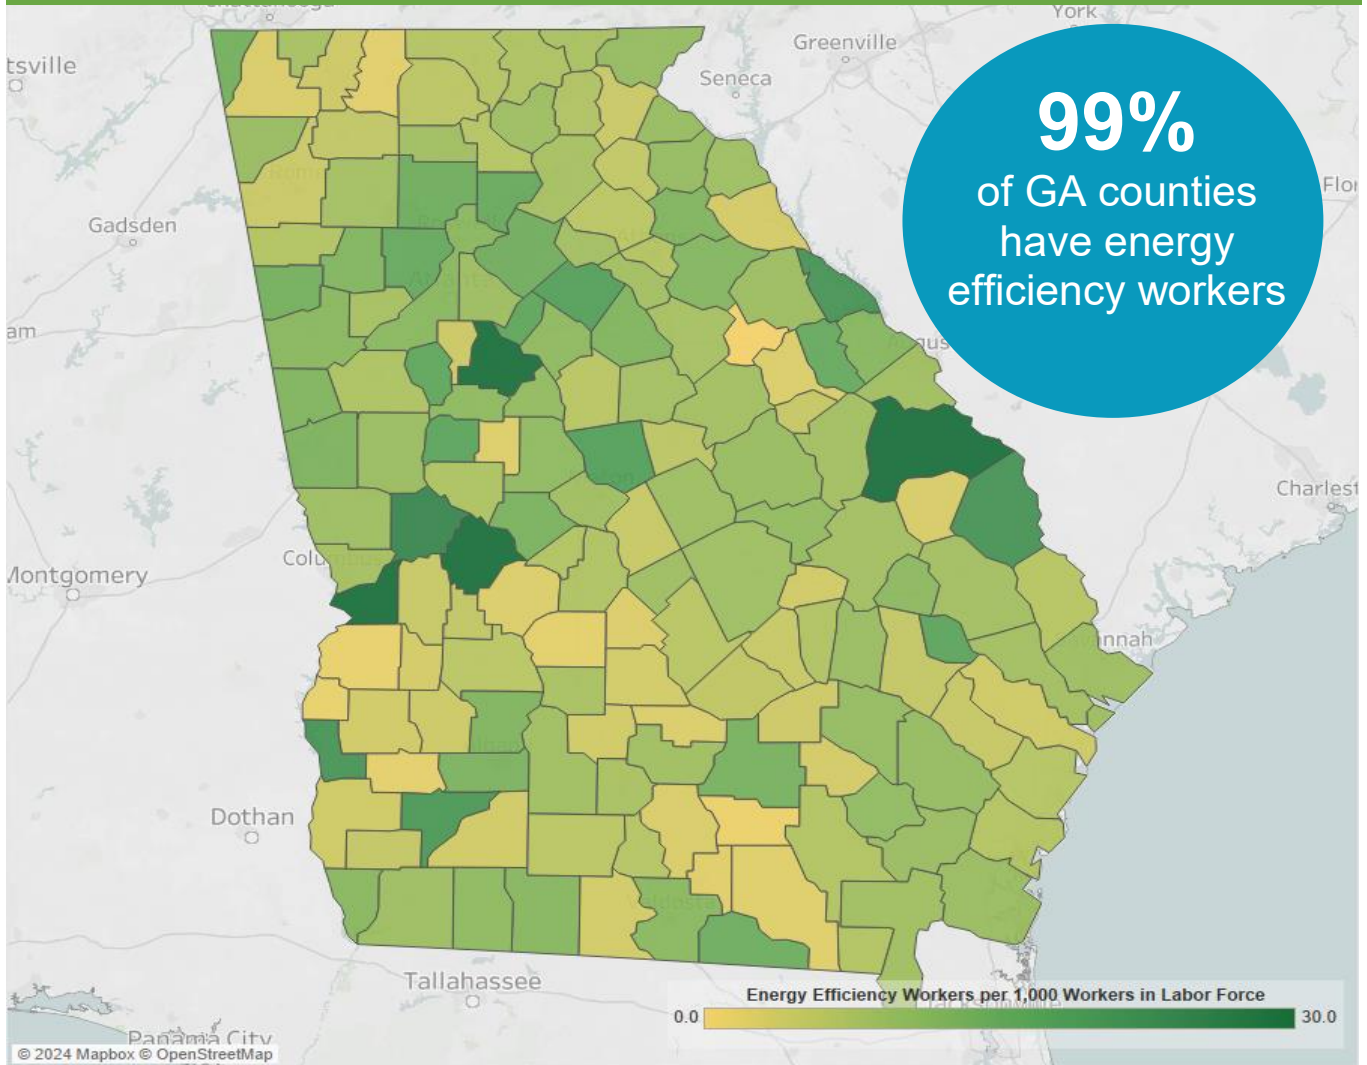

Gender in the Georgia EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

Energy Efficiency Jobs are Everywhere

EE Jobs by County

The energy efficiency job concentration displayed above is capped at thirty jobs per thousand in order to maintain observable differences between the majority of counties within the state. This is done to eliminate the influence outliers have on overall color gradient. For a full list of energy efficiency jobs by county, please visit the Department of Energy's (DOE) United States Energy and Employment Report (USEER) County-Level data site at <https://www.energy.gov/media/330956>.

Illinois

Energy Efficiency Jobs in America

86,728
Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Illinois?

Energy efficiency is the largest energy sector in Illinois.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

Updated April 2025

What does EE look like in Illinois?

EE Workers Employed in IL

94.1% of IL EE Businesses Have Fewer Than 100 Employees

EE construction workers comprise **19%** of Illinois's construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

9%
 of Illinois
 EE workers are
Veterans

How is EE doing on diversity in Illinois?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Illinois communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Illinois businesses.

Illinois EE Industry by Race and Ethnicity

*Includes non-Hispanic and Hispanic whites.

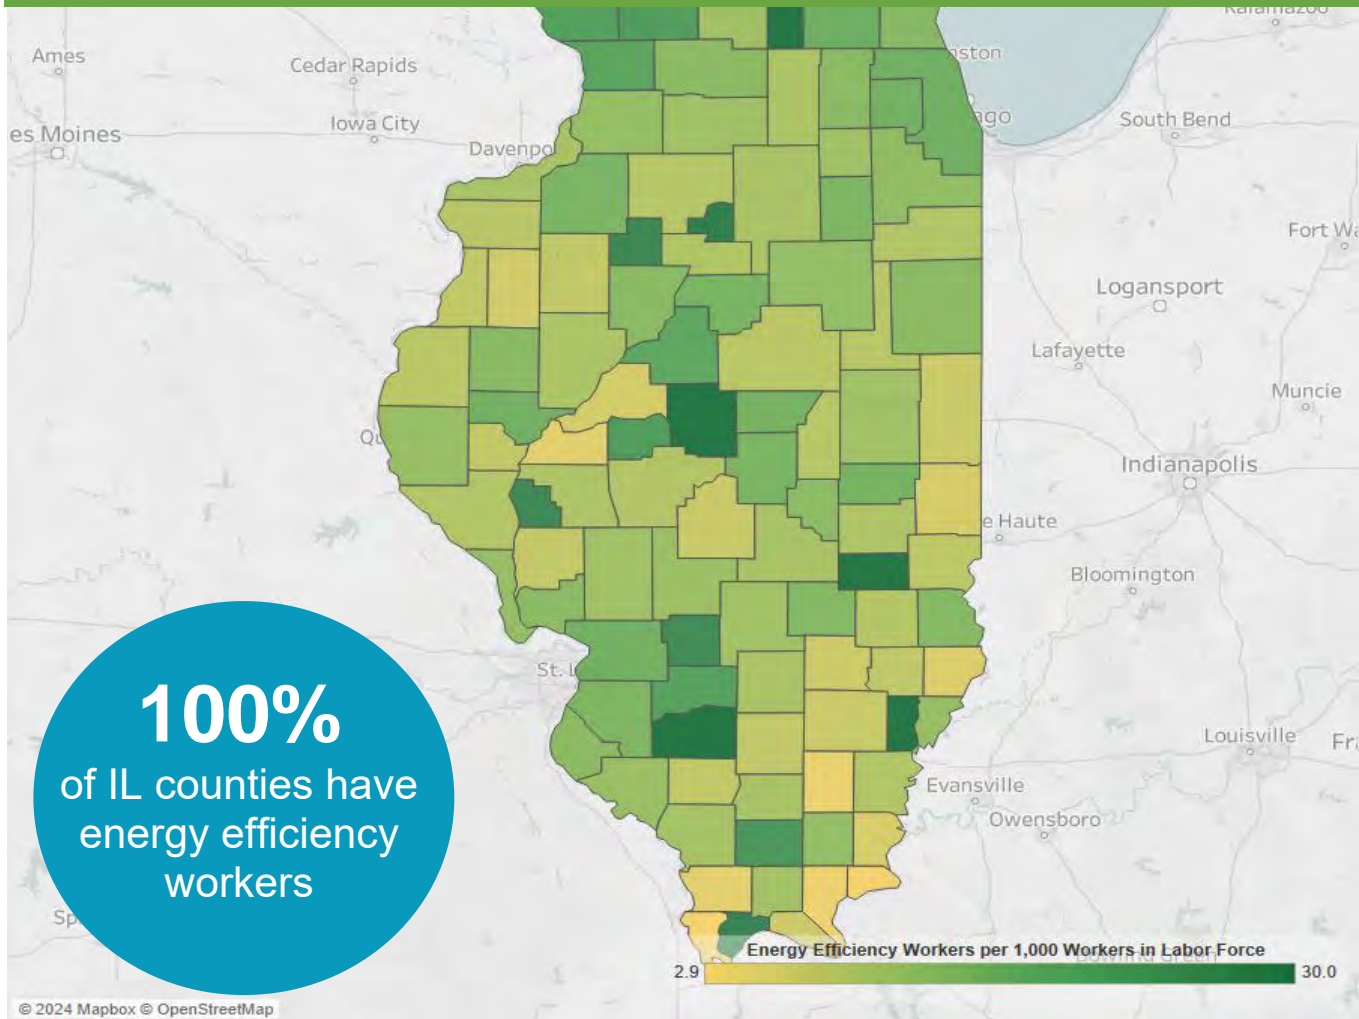

Gender in the Illinois EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

Energy Efficiency Jobs are Everywhere

EE Jobs by County

The energy efficiency job concentration displayed above is capped at thirty jobs per thousand in order to maintain observable differences between the majority of counties within the state. This is done to eliminate the influence outliers have on overall color gradient. For a full list of energy efficiency jobs by county, please visit the Department of Energy's (DOE) United States Energy and Employment Report (USEER) County-Level data site at <https://www.energy.gov/media/330956>.

The Building Performance Association (BPA) is a 501(c) 6 nonprofit industry association that serves as the hub for businesses, nonprofits, and government agencies working to make America's homes more comfortable, healthy, and energy efficient. Our mission is to transform the market for the home performance industry through advocacy, education, professional development, and networking. Visit www.building-performance.org.

E4TheFuture is dedicated to bringing clean, efficient energy home for every American and promotes energy solutions to advance climate protection and economic fairness. Visit www.E4TheFuture.org.

BW Research Partnership is a full-service, economic and workforce research consulting firm with offices in Carlsbad, California and Wrentham, Massachusetts. It is the nation's leading provider of accurate, comprehensive energy and clean energy research studies. Visit www.bwresearch.com.

Data Source: Unless otherwise stated, all data are from the U.S. Energy and Employment Report, August 2024, by the U.S. Department of Energy (see Appendix B for methodology details). This methodology — adopted by the U.S. Dept. of Energy for its 2017 U.S. Energy and Employment Report, approved by the Office of Management and Budget and grounded on data collected by the Bureau of Labor Statistics — provides the broadly accepted best accounting of all U.S. energy workers.

For questions on BPA analyses please email: communications@building-performance.org

Kansas

Energy Efficiency Jobs in America

17,685
Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Kansas?

Energy efficiency is the second largest energy sector in Kansas.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

Nuclear (EPG & Fuels) = 1,254

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

What does EE look like in Kansas?

EE Workers Employed in KS

98.4% of KS EE Businesses Have Fewer Than 100 Employees

EE construction
workers comprise
10% of Kansas's
construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

8%
 of Kansas
 EE workers are
Veterans

How is EE doing on diversity in Kansas?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Kansas communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Kansas businesses.

Kansas EE Industry by Race and Ethnicity

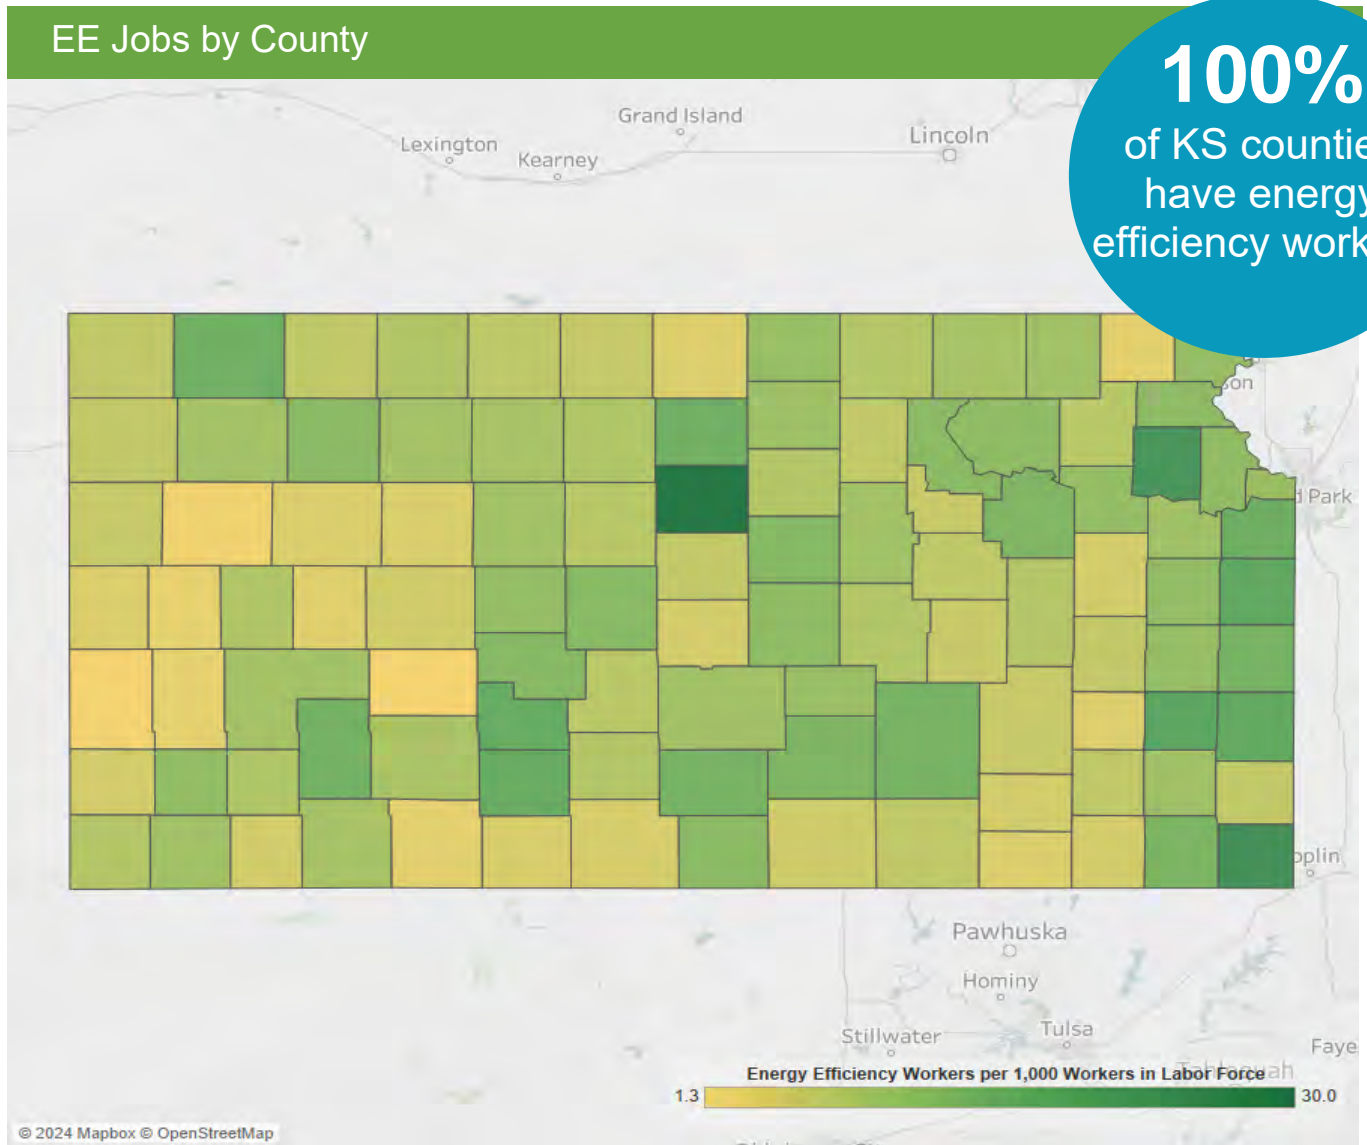

*Includes non-Hispanic and Hispanic whites.

Gender in the Kansas EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

Energy Efficiency Jobs are Everywhere

The energy efficiency job concentration displayed above is capped at thirty jobs per thousand in order to maintain observable differences between the majority of counties within the state. This is done to eliminate the influence outliers have on overall color gradient. For a full list of energy efficiency jobs by county, please visit the Department of Energy's (DOE) United States Energy and Employment Report (USEER) County-Level data site at <https://www.energy.gov/media/330956>.

- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Maine?

Energy efficiency is the largest energy sector in Maine.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

Nuclear (EPG & Fuels) = 10

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

E4 THE FUTURE

What does EE look like in Maine?

EE Workers Employed in ME

97.8% of ME EE Businesses Have Fewer Than 100 Employees

EE construction workers comprise 19% of Maine's construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

8%
 of Maine
 EE workers are
Veterans

How is EE doing on diversity in Maine?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Maine communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Maine businesses.

Maine EE Industry by Race and Ethnicity

*Includes non-Hispanic and Hispanic whites.

Gender in the Maine EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

Energy Efficiency Jobs in America

67,772
Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Maryland?

Energy efficiency is the largest energy sector in Maryland.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

Nuclear (EPG & Fuels) = 1,320

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

What does EE look like in Maryland?

EE Workers Employed in MD

90.4% of MD EE Businesses Have Fewer Than 100 Employees

EE construction workers comprise
31% of Maryland's construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling

How is EE doing on diversity in Michigan?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Michigan communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Michigan businesses.

Michigan EE Industry by Race and Ethnicity

*Includes non-Hispanic and Hispanic whites.

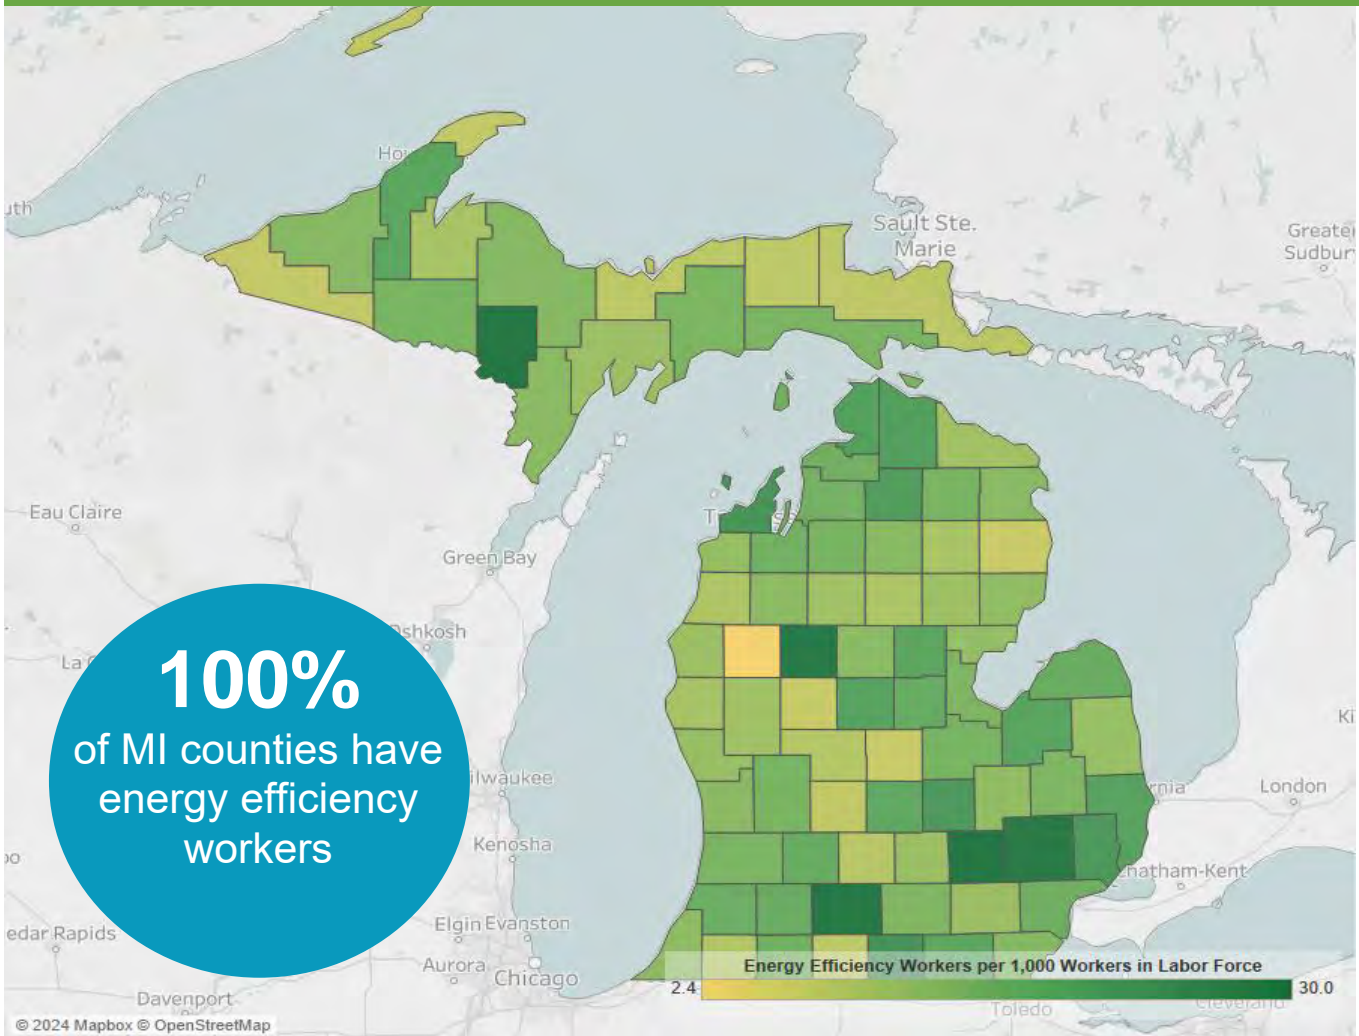

Gender in the Michigan EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

Energy Efficiency Jobs are Everywhere

EE Jobs by County

The energy efficiency job concentration displayed above is capped at thirty jobs per thousand in order to maintain observable differences between the majority of counties within the state. This is done to eliminate the influence outliers have on overall color gradient. For a full list of energy efficiency jobs by county, please visit the Department of Energy's (DOE) United States Energy and Employment Report (USEER) County-Level data site at <https://www.energy.gov/media/330956>.

Energy Efficiency Jobs in America

44,511
Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Minnesota?

Energy efficiency is the largest energy sector in Minnesota.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

What does EE look like in Minnesota?

EE Workers Employed in MN

94.7% of MN EE Businesses Have Fewer Than 100 Employees

EE construction workers comprise **22%** of Minnesota's construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Missouri?

Energy efficiency is the largest energy sector in Missouri.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

Nuclear (EPG & Fuels) = 1,012

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

E4 THE FUTURE

What does EE look like in Missouri?

EE Workers Employed in MO

91.8% of MO EE Businesses Have Fewer Than 100 Employees

EE construction workers comprise **16%** of Missouri's construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

9%
 of Missouri
 EE workers are
Veterans

How is EE doing on diversity in Missouri?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Missouri communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Missouri businesses.

Missouri EE Industry by Race and Ethnicity

*Includes non-Hispanic and Hispanic whites.

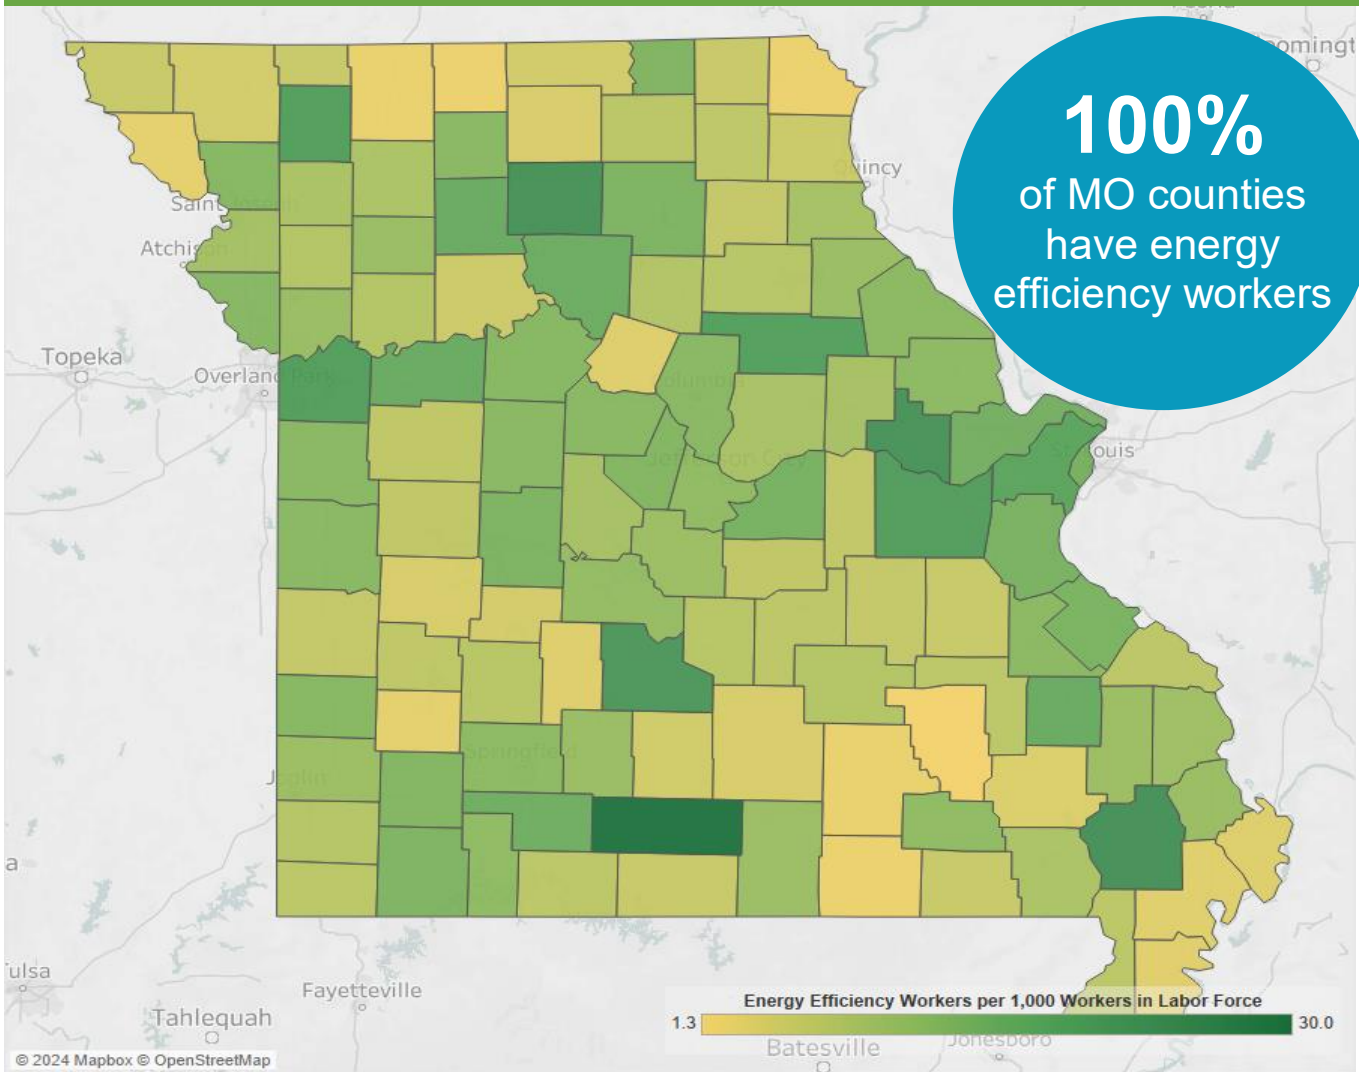

Gender in the Missouri EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

Energy Efficiency Jobs are Everywhere

EE Jobs by County

The energy efficiency job concentration displayed above is capped at thirty jobs per thousand in order to maintain observable differences between the majority of counties within the state. This is done to eliminate the influence outliers have on overall color gradient. For a full list of energy efficiency jobs by county, please visit the Department of Energy's (DOE) United States Energy and Employment Report (USEER) County-Level data site at <https://www.energy.gov/media/330956>.

New Hampshire

Energy Efficiency Jobs in America

11,628
Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in New Hampshire?

Energy efficiency is the largest energy sector in New Hampshire.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

Updated April 2025

What does EE look like in New Hampshire?

EE Workers Employed in NH

97.6% of NH EE Businesses Have Fewer Than 100 Employees

EE construction
workers comprise
22% of New
Hampshire's
construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

How is EE doing on diversity in New Hampshire?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all New Hampshire communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at New Hampshire businesses.

*Includes non-Hispanic and Hispanic whites.

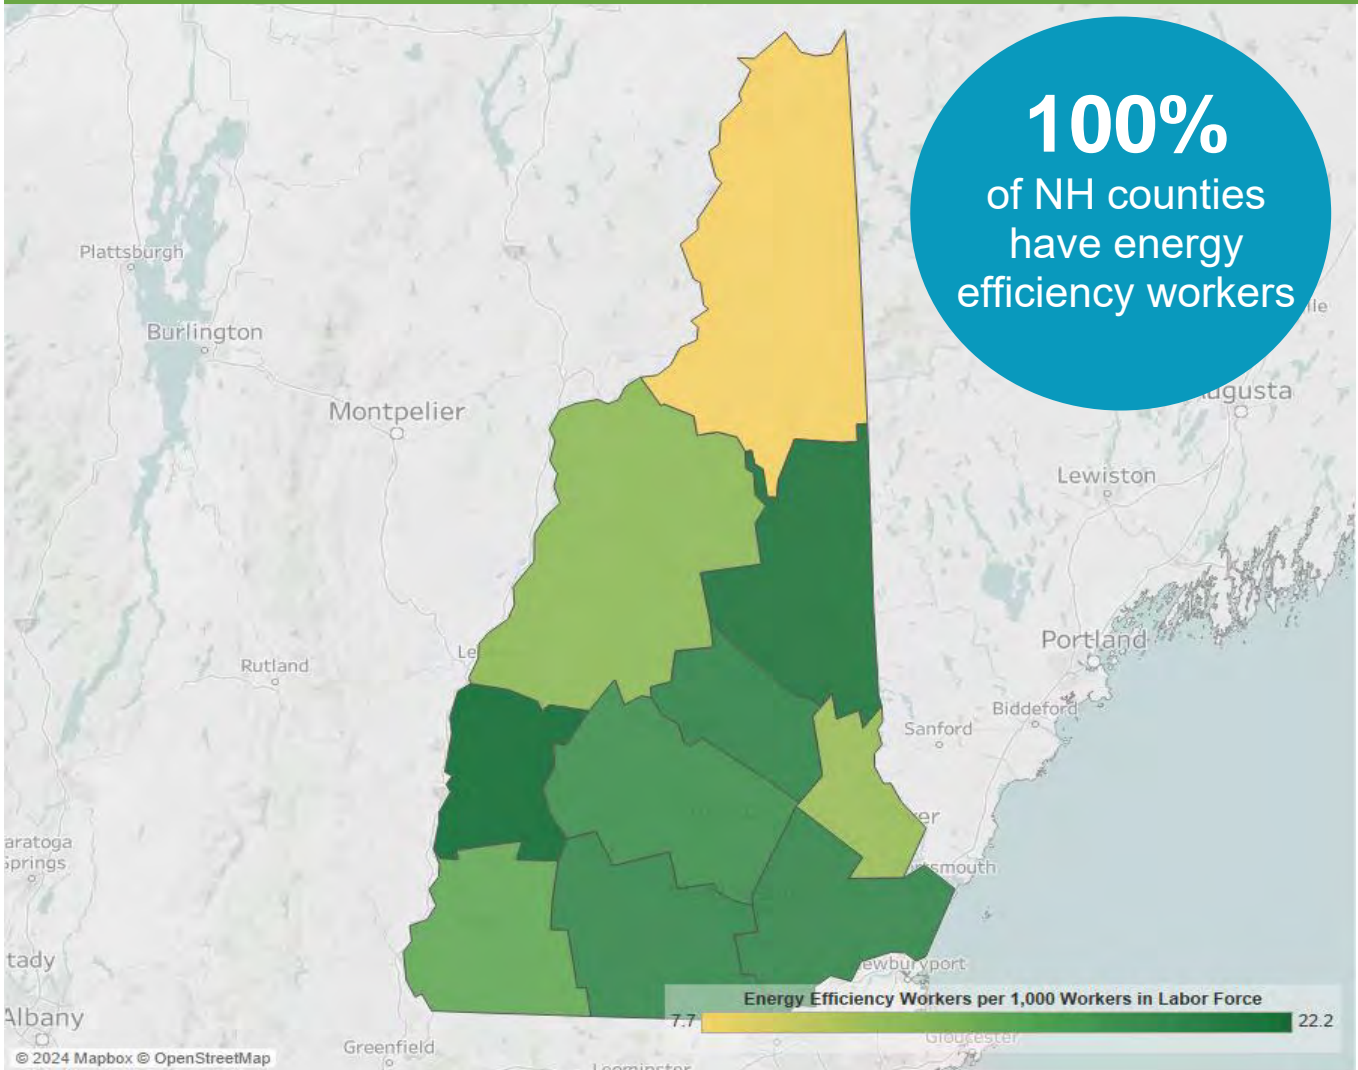

Gender in the New Hampshire EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

North Carolina

Energy Efficiency Jobs in America

80,817
Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in North Carolina?

Energy efficiency is the largest energy sector in North Carolina.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

Nuclear (EPG & Fuels) = 1,806

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

E4 THE FUTURE

Updated April 2025

What does EE look like in North Carolina?

EE Workers Employed in NC

95% of NC EE Businesses Have Fewer Than 100 Employees

EE construction workers comprise **13%** of North Carolina's construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

10%
 of North Carolina
 EE workers are
Veterans

How is EE doing on diversity in North Carolina?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all North Carolina communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at North Carolina businesses.

North Carolina EE Industry by Race and Ethnicity

*Includes non-Hispanic and Hispanic whites.

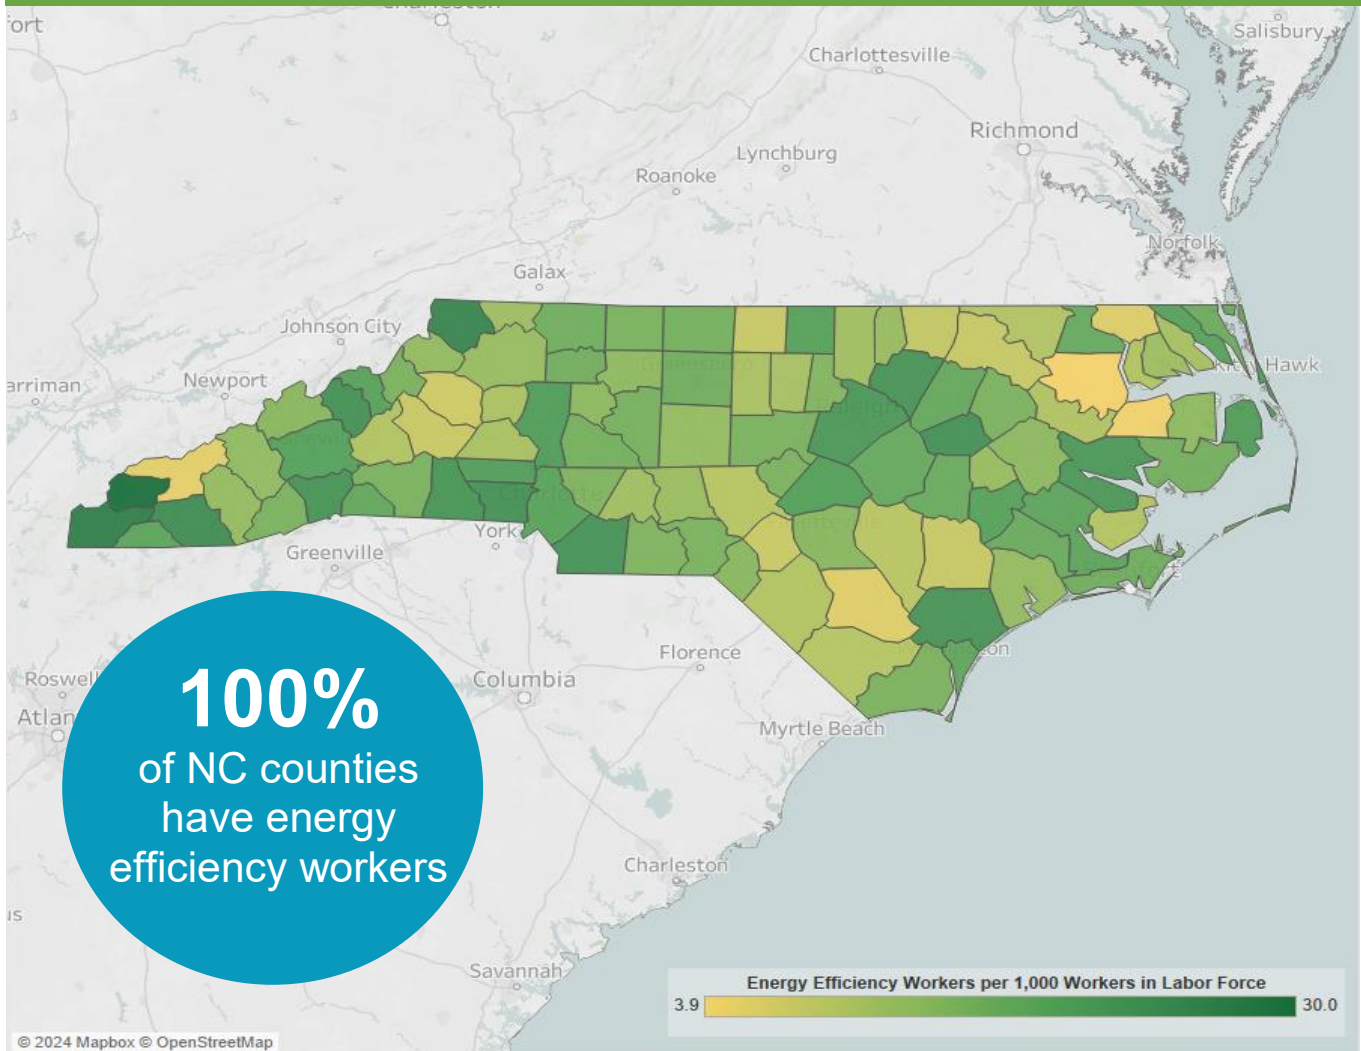

Gender in the North Carolina EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

Energy Efficiency Jobs are Everywhere

EE Jobs by County

The energy efficiency job concentration displayed above is capped at thirty jobs per thousand in order to maintain observable differences between the majority of counties within the state. This is done to eliminate the influence outliers have on overall color gradient. For a full list of energy efficiency jobs by county, please visit the Department of Energy's (DOE) United States Energy and Employment Report (USEER) County-Level data site at <https://www.energy.gov/media/330956>.

The Building Performance Association (BPA) is a 501(c) 6 nonprofit industry association that serves as the hub for businesses, nonprofits, and government agencies working to make America's homes more comfortable, healthy, and energy efficient. Our mission is to transform the market for the home performance industry through advocacy, education, professional development, and networking. Visit www.building-performance.org.

E4TheFuture is dedicated to bringing clean, efficient energy home for every American and promotes energy solutions to advance climate protection and economic fairness. Visit www.E4TheFuture.org.

BW Research Partnership is a full-service, economic and workforce research consulting firm with offices in Carlsbad, California and Wrentham, Massachusetts. It is the nation's leading provider of accurate, comprehensive energy and clean energy research studies. Visit www.bwresearch.com.

Data Source: Unless otherwise stated, all data are from the U.S. Energy and Employment Report, August 2024, by the U.S. Department of Energy (see Appendix B for methodology details). This methodology — adopted by the U.S. Dept. of Energy for its 2017 U.S. Energy and Employment Report, approved by the Office of Management and Budget and grounded on data collected by the Bureau of Labor Statistics — provides the broadly accepted best accounting of all U.S. energy workers.

Oklahoma

Energy Efficiency Jobs in America

14,867
Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Oklahoma?

Energy efficiency is the third largest energy sector in Oklahoma.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

Nuclear (EPG & Fuels) = 46

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

Updated April 2025

What does EE look like in Oklahoma?

EE Workers Employed in OK

97.5% of OK EE Businesses Have Fewer Than 100 Employees

EE construction workers comprise **12%** of Oklahoma's construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

9%
 of Oklahoma
 EE workers are
Veterans

How is EE doing on diversity in Oklahoma?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Oklahoma communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Oklahoma businesses.

Oklahoma EE Industry by Race and Ethnicity

*Includes non-Hispanic and Hispanic whites.

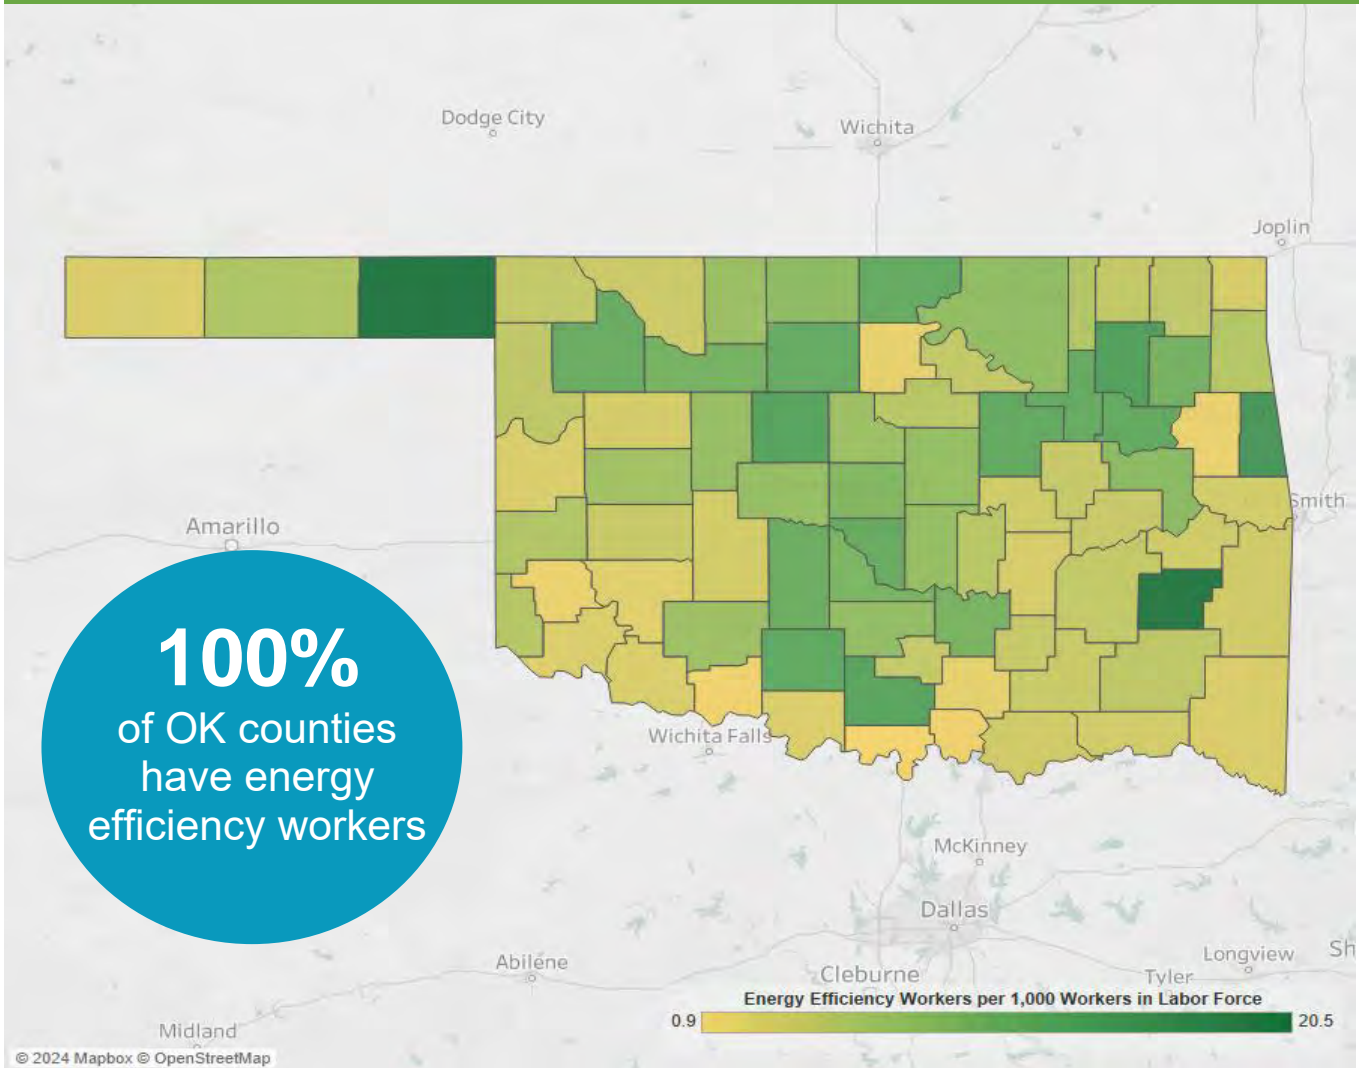

Gender in the Oklahoma EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

The Building Performance Association (BPA) is a 501(c) 6 nonprofit industry association that serves as the hub for businesses, nonprofits, and government agencies working to make America's homes more comfortable, healthy, and energy efficient. Our mission is to transform the market for the home performance industry through advocacy, education, professional development, and networking. Visit www.building-performance.org.

E4TheFuture is dedicated to bringing clean, efficient energy home for every American and promotes energy solutions to advance climate protection and economic fairness. Visit www.E4TheFuture.org.

BW Research Partnership is a full-service, economic and workforce research consulting firm with offices in Carlsbad, California and Wrentham, Massachusetts. It is the nation's leading provider of accurate, comprehensive energy and clean energy research studies. Visit www.bwresearch.com.

Data Source: Unless otherwise stated, all data are from the U.S. Energy and Employment Report, August 2024, by the U.S. Department of Energy (see Appendix B for methodology details). This methodology — adopted by the U.S. Dept. of Energy for its 2017 U.S. Energy and Employment Report, approved by the Office of Management and Budget and grounded on data collected by the Bureau of Labor Statistics — provides the broadly accepted best accounting of all U.S. energy workers.

Rhode Island

Energy Efficiency Jobs in America

11,330

Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Rhode Island?

Energy efficiency is the largest energy sector in Rhode Island.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

Nuclear (EPG & Fuels) = 83

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

Updated April 2025

What does EE look like in Rhode Island?

EE Workers Employed in RI

97.6% of RI EE Businesses Have Fewer Than 100 Employees

EE construction
workers comprise
31% of Rhode
Island's construction
workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

8%
 of Rhode Island
 EE workers are
Veterans

How is EE doing on diversity in Rhode Island?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Rhode Island communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Rhode Island businesses.

Rhode Island EE Industry by Race and Ethnicity

*Includes non-Hispanic and Hispanic whites.

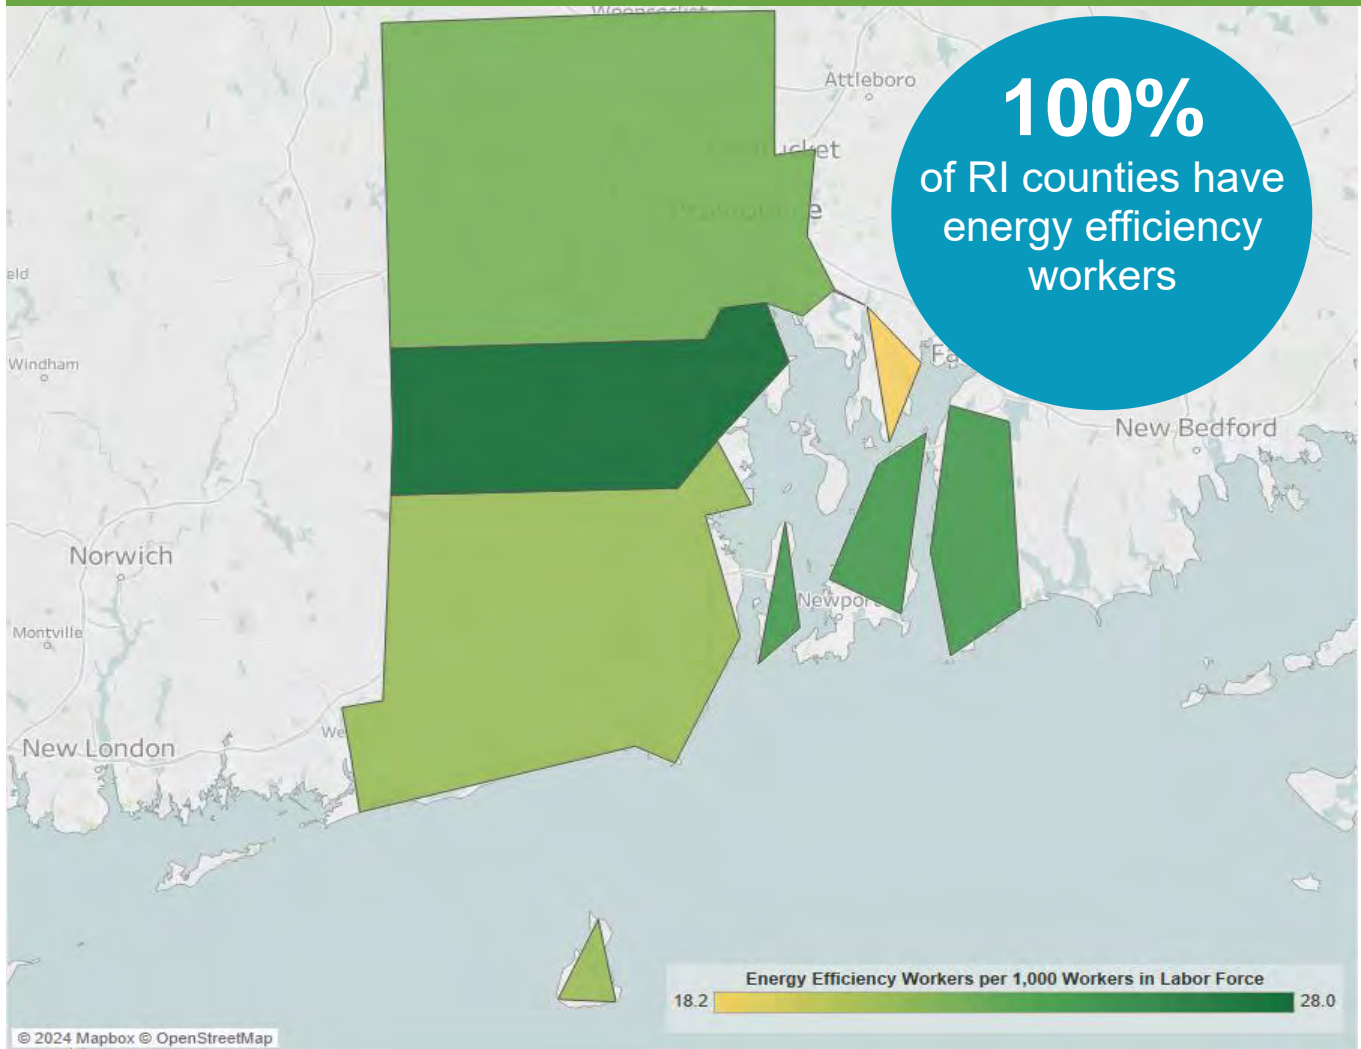

Gender in the Rhode Island EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

Tennessee

Energy Efficiency Jobs in America

51,465
Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Tennessee?

Energy efficiency is the largest energy sector in Tennessee.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

Nuclear (EPG & Fuels) = 140

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

Updated April 2025

What does EE look like in Tennessee?

EE Workers Employed in TN

96.4% of TN EE Businesses Have Fewer Than 100 Employees

EE construction
workers comprise
19% of Tennessee's
construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

How is EE doing on diversity in Tennessee?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Tennessee communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Tennessee businesses.

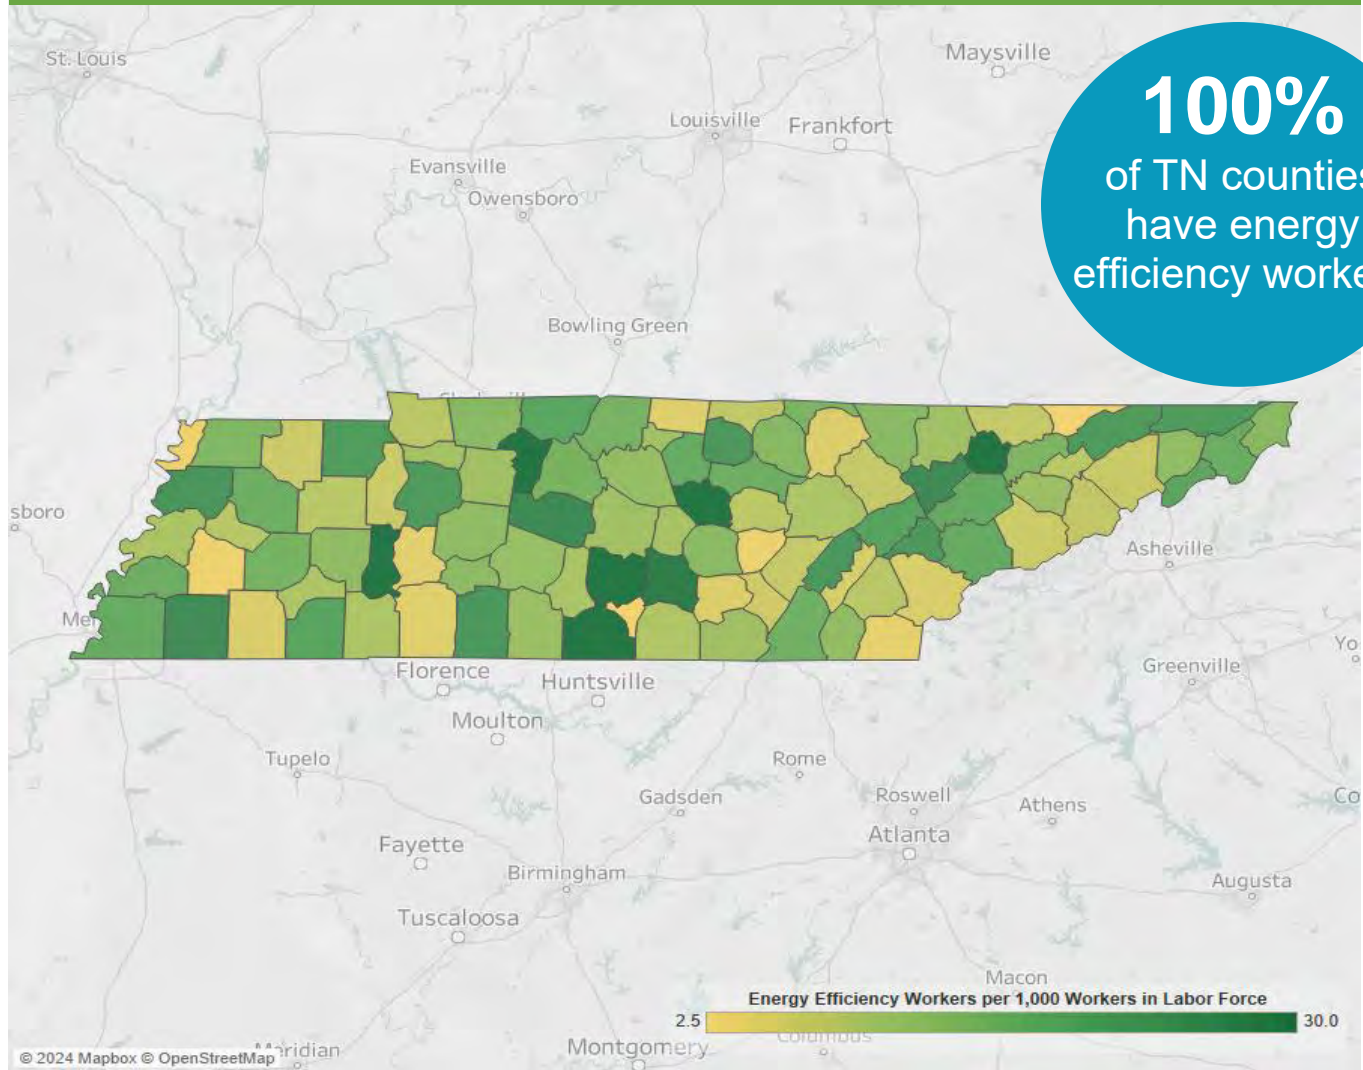

*Includes non-Hispanic and Hispanic whites.

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

Energy Efficiency Jobs are Everywhere

EE Jobs by County

The energy efficiency job concentration displayed above is capped at thirty jobs per thousand in order to maintain observable differences between the majority of counties within the state. This is done to eliminate the influence outliers have on overall color gradient. For a full list of energy efficiency jobs by county, please visit the Department of Energy's (DOE) United States Energy and Employment Report (USEER) County-Level data site at <https://www.energy.gov/media/330956>.

The Building Performance Association (BPA) is a 501(c) 6 nonprofit industry association that serves as the hub for businesses, nonprofits, and government agencies working to make America's homes more comfortable, healthy, and energy efficient. Our mission is to transform the market for the home performance industry through advocacy, education, professional development, and networking. Visit www.building-performance.org.

E4TheFuture is dedicated to bringing clean, efficient energy home for every American and promotes energy solutions to advance climate protection and economic fairness. Visit www.E4TheFuture.org.

BW Research Partnership is a full-service, economic and workforce research consulting firm with offices in Carlsbad, California and Wrentham, Massachusetts. It is the nation's leading provider of accurate, comprehensive energy and clean energy research studies. Visit www.bwresearch.com.

Data Source: Unless otherwise stated, all data are from the U.S. Energy and Employment Report, August 2024, by the U.S. Department of Energy (see Appendix B for methodology details). This methodology — adopted by the U.S. Dept. of Energy for its 2017 U.S. Energy and Employment Report, approved by the Office of Management and Budget and grounded on data collected by the Bureau of Labor Statistics — provides the broadly accepted best accounting of all U.S. energy workers.

Wisconsin

Energy Efficiency Jobs in America

56,868
Total Jobs

What are EE jobs?

Jobs that deliver goods and services that lower energy use by improving energy efficiency with a focus on appliances, buildings, data systems, financing, new technologies, and more.

What do EE workers do?

- **Manufacture and install** high-efficiency systems, controls, windows, insulation, and ENERGY STAR-certified appliances and products in existing and new homes, commercial and industrial buildings.
- **Design and construct** high-performance buildings such as those earning nationally recognized sustainability and environmental performance ratings.
- **Upgrade and repair** heating, air conditioning, and ventilation (HVAC) and water heating equipment.
- **Educate** property owners and managers on building improvements to unlock savings for businesses, homeowners, schools, states, municipalities, military bases, and more.
- **Analyze building data** using software to maximize energy savings through targeted performance improvements and behavioral changes.
- **Review and approve loans** to finance energy savings performance contracts to improve the comfort, health, and operational costs of buildings.

How does EE compare in Wisconsin?

Energy efficiency is the largest energy sector in Wisconsin.

TDS = Transmission, Distribution & Storage

EPG = Electric Power Generation

Nuclear (EPG & Fuels) = 1,112

*Includes other energy subsectors such as corn ethanol, woody biomass, large hydropower, and others.

Presented by:

Updated April 2025

What does EE look like in Wisconsin?

EE Workers Employed in WI

94.3% of WI EE Businesses Have Fewer Than 100 Employees

EE construction workers comprise
21% of Wisconsin's construction workforce

What type of work do energy efficiency firms do?

*Professional services include finance/accounting, architecture, engineering, R&D, etc. and other includes maintenance, and business, and nonprofit organizations.

What energy efficiency sectors employ the most workers?

*Heating, ventilation, air conditioning of higher than standard efficiency/renewable heating & cooling
 **Other such as energy audits, building certifications, and software services

10%
 of Wisconsin
 EE workers are
Veterans

How is EE doing on diversity in Wisconsin?

Demographic data is critical to measure progress in expanding the diversity of the EE industry. A more inclusive industry that reflects the communities it serves is a stronger one that better meets the needs of all U.S. residents. Promoting diversity in hiring is key to maintaining a future workforce of qualified professionals and ensuring all Wisconsin communities are represented in the EE sector.

The EE industry needs to do more to prioritize minorities and women for training and support that enables access to employment at Wisconsin businesses.

Wisconsin EE Industry by Race and Ethnicity

*Includes non-Hispanic and Hispanic whites.

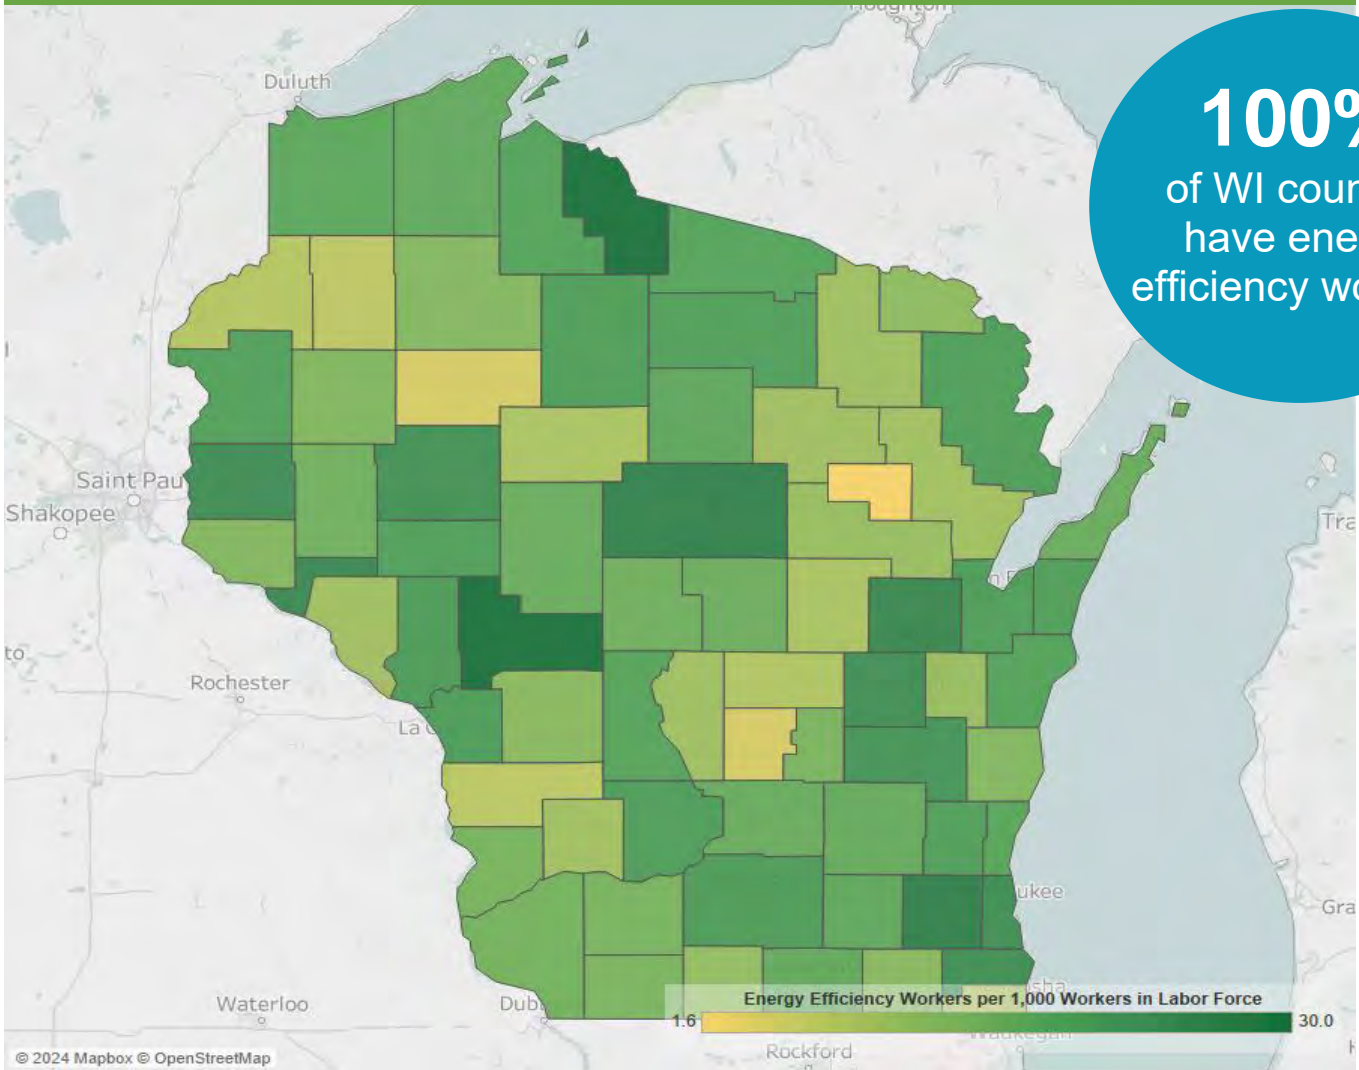

Gender in the Wisconsin EE Workforce

Note: The U.S. Bureau of Labor Statistics (BLS) only includes two genders in their survey. Non-binary gender data is missing from this document due to this limitation.

Energy Efficiency Jobs are Everywhere

EE Jobs by County

The energy efficiency job concentration displayed above is capped at thirty jobs per thousand in order to maintain observable differences between the majority of counties within the state. This is done to eliminate the influence outliers have on overall color gradient. For a full list of energy efficiency jobs by county, please visit the Department of Energy's (DOE) United States Energy and Employment Report (USEER) County-Level data site at <https://www.energy.gov/media/330956>.
