

ENERGY EFFICIENCY NEEDS

CONTINUED COLLABORATION - Like today's event

- Tutoring for test takers and field testing strategies for auditors, QCIs, etc.
- Video showing the incredible impact EE has on a home that can be shared with high schools and technical centers.
- Fiscal training for community action agencies to learn from one another
- Idea from today is moving private sector contractors who will be involved with the new funding for weatherization into middle and higher income homes when weatherization funding ends. *Potential revenue stream* is a key
- Promoting awareness of existing availabilities. Get the word out about training and jobs.
- Training for the real estate community: realtors, appraisers, lenders, and inspectors
- There is a gap in terms of funding or incentives lower middle and middle income residents, and rental properties that aren't multi family units
- Health and safety dollars to help solve deferrals.
- ApCo gap assessment
- Inventory of EE resources in WV
- Establish working groups amongst participants today
- Justice 40 Representation
- Phone banks return calls to WAP customers, who have a year to get services; needs for gathering documents, too, plus other barriers.

ENERGY EFFICIENCY RESOURCES

- GREEN designation for REALTORS - Minimum of 10 participants required. Appraisers can join
