

# 21<sup>st</sup> Century Energy Center

*The 21<sup>st</sup> Century Energy Center, part of California's Kern Community College District (KCCD), offers workforce training programs for the renewable energy sector.*

KCCD trainings equip students with essential skills and certifications to enhance their employability in energy efficiency industries. These include basic construction training, electrical training, and more.

## Basic Construction Training

This program covers fundamental skills such as tool handling, safety protocols, and blueprint reading. Participants will also receive training in workplace professionalism, communication, and teamwork to enhance employability.

Graduates receive National Center for Construction Education and Research (NCCER) Core Skills certification.

## Basic Electrical Concepts

This program is designed for individuals in the construction trade with limited existing knowledge on electrical systems. Problem solving and teamwork are also core tenets of the training.

Graduates will develop a technical knowledge of maintenance and repair, load management, and more.

KCCD provides supportive services to students, including:

- Apprenticeships and Internships
- Subsidized Employment
- Career Services and Job Development
- Supportive Services (childcare, transportation, etc.)
- Workshops and Training
- And more
