

EnerCity Collaborative

Training

Oregon's **EnerCity Collaborative (ECC)** equips existing contractors and aspiring workers with the skills needed to thrive in the growing energy efficiency sector.

ECC's comprehensive training programs provide hands-on instruction in building science, new construction, and energy efficiency, ensuring that participants are prepared to take advantage of the expanding opportunities and funding in the residential energy space.

ECC's training focus areas include:

Building Science and Home Energy Auditing

- Understanding home performance, diagnostics, and efficiency upgrades.

Green Construction Pathways

- Training students and emerging professionals in sustainable building practices.

Contractor and Workforce Development

- Supporting contractors and new trainees in gaining technical skills, certifications, and business growth opportunities.

ECC partners with 7 organizations statewide to provide Pre-Apprenticeship Training. ECC also provides Sustainable Home Professional (SHP) training through three statewide organizations.

All ECC trainings meet the latest standards of the Building Performance Institute (BPI) to ensure that students are equipped with the necessary skills and credentials to excel in the energy efficiency and home performance industries.

How You Can Get Involved

ECC trainings are open to participants of varying experience levels.
