

BPA PRESENTS

THE CLEAN ENERGY FOR HOMES

CONFERENCE & TRADE SHOW

SUPPORTED BY

NYSERDA
New York State Energy Research
and Development Authority

New York's clean energy landscape is always evolving.

CEFH'26 keeps contractors ahead of what's next.

May 28-29 | Saragota Springs, New York

Get the Updates You Need in One Place

What's driving New York's residential program overhaul and how to position your business for what's next.

Clean energy program changes are expected in fall of 2026 – prepare for what's coming.

Understand how to utilize higher incentives for homeowners for heat pump projects in weatherized homes.

Session Highlights

Building Science for Home Performance Trades

Right-Sizing Air Source Heat Pumps: Aligning Policy, Programs, and Field Practice

Weatherization Impacts on HVAC Performance

Setting Up Heat Pumps for Success: Exploring NYSERDA's Updated Building Envelope Standards

From Spreadsheet to Site: Building Residential Audit Skills Using Excel

What's First? Weatherize-First!

Plus, enjoy sessions from six other tracks, including Building Science Best Practices for a foundational knowledge of technical requirements.

Join Us & Stay Ahead

BPA and CEFH are preparing contractors to stay ahead of New York's evolving programs.
